ARTICLES
A Comparison of U.S. and Soviet Efforts to Explore Mars:
B. C. Murray and M. E. Davies

U.S. effort remains minimal despite early success, Soviet effort remains large despite early failures.

The 1965 Eruption of Taal Volcano: J. G. Moore, K. Nakamura, A. Alcaraz

Catastrophic explosions are caused by lake water entering a volcanic conduit.

Molecular Orbital Densities: Pictorial Studies: A. C. Wahl

Comparisons of the hydrogen, lithium, boron, carbon, nitrogen, oxygen, and fluorine molecules.

NEWS AND COMMENT

Report from Europe: How Quickly Will Europe Close the Science Spending Gap?: V. K. McElheny

BOOK REVIEWS

REPORTS
Superconductivity of Beta-Uranium: B. T. Matthias et al.

Direct Evidence for the Cathodic Depolarization Theory of Bacterial Corrosion: W. P. Iverson
Acrylamide-Gel Electrophorograms by Mechanical Fractionation: Radioactive Adenovirus Proteins: J. V. Maizel, Jr. ................................................................. 988
Oxidation of Graphitic Carbon in Certain Soils: E. A. Shneour .................................................. 991
Polyribosome Disaggregation during Metaphase: M. D. Scharff and E. Robbins .................. 992
Blood Flow in the Microvasculature of the Conjunctiva of Man: R. E. Wells, E. R. Schildkraut, H. E. Edgerton ........................................................................ 995
Culture of a Planktonic Calanoid Copepod through Multiple Generations: E. J. Zilliox and D. F. Wilson ................................................................. 996
Antagonism of Purified Asparaginase from Guinea Pig Serum toward Lymphoma: T. O. Yellin and J. C. Wriston, Jr. ........................................... 998
Electron Microscopic Autoradiography of Rabbit Reticulocytes Active and Inactive in Protein Synthesis: A. Miller and A. B. Maunsbach ............. 1000
Polysome Morphology: Evidence for Endocrine Control during Chick Embryogenesis: M. B. Yatvin ........................................................................ 1001
Quenchable High-Pressure Polymorph of Zinc Selenate: C. W. F. T. Pistorius .................. 1003
Actinomycin D: Inhibition of Respiration and Glycolysis: J. Laszlo et al. ......................... 1007
Transport of Sugars and Amino Acids in the Intestine: Evidence for a Common Carrier: F. Alvarado ................................................................................. 1010
Visually Evoked Potentials: Amplitude Changes with Age: R. E. Dustman and E. C. Beck .................................................................................. 1013
Comment Report: Atmospheric Noble Gases from Extraterrestrial Dust: D. Tilles .... 1015

MEETINGS

Drugs Affecting Lipid Metabolism: D. Kritchevsky; Forthcoming Events ........................ 1016

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
