FOR RAPID, RELIABLE
THE NALGENE®
CONSTANT VOLUME
PIPETTOR

Here's an exactly... delivering a fixed quantity of a chemical... automatically... accurately... using only one hand. Here's all you do:

1. Fill reservoir bottle to fill line.
2. Squeeze gently to fill measuring chamber.
3. Invert pipettor.
4. Squeeze.

Use several for procedures requiring repeated dispensing of different reagents. Unbreakable... resists most chemicals. Disassembled in seconds for cleaning and refilling. All units have 8 oz. polyethylene reservoir bottle with choice of 1, 2, 3, or 5 ml polypropylene measuring chamber. Price: $4.50 each. May be assorted with other Nalgene Laboratoryware for maximum discount. Ask your lab supply dealer, or write Dept. 21261, The Nalge Co., Inc., 75 Panorama Creek Drive, Rochester, New York 14625.

New this month!
Caro:
ADVANCES IN RESPIRATORY PHYSIOLOGY

Designed to describe the growing points in this advancing field of physiology, and to stimulate and provoke further research, this volume is the combined contribution of eight British and American workers in different specialized branches of respiratory physiology. The book presents current research in perspective to the body of science, discusses the theory which underlies it, and indicates where in the field theory, method or experimental observation is inadequate.
Edited by Colin Caro, M.D., F.R.C.P., Lecturer, Department of Medicine, St. Thomas's Hospital Medical School, London.

American Soc. for Pharmacology and Experimental Therapeutics
American Soc. for Experimental Pathology
American Inst. of Nutrition
American Assoc. of Immunologists

T he newest, most versatile version of this famous fraction collector, currently serving scientists in more than a thousand laboratories all over the world, is now available for immediate delivery direct to you from Canalco's plant in Rockville, Maryland. With the Canalco 1205 Fraction Collector, you can have accurate volumetric siphoning (2, 5, 10 or 20 ml fractions), timed flow (18 seconds to 2 hours) and drop counting (1 to 400 drops). Interchangeable turntables hold either 150 or 240 test tubes to collect fractions up to either 5 or 20 ml.

Canalco's own factory-trained technical representatives stand ready to assist in installation and guide you in operation at no extra cost. Canalco thus gives you double assurance of the same dependable, trouble-free performance on which this collector has built its unsurpassed reputation for quality and reliability. A two-year warranty provides added protection.

For sample collection plus flow analysis, the Canalco 1205 makes an integrated system with Canalco's Wide-Track 85 Ultraviolet Flow Monitor. Available in three models—all with true ratio recorders whose charts are as wide as this full three-column page—the Wide-Tracks give more sensitive detection of both proteins and nucleotides, and cost less, than any other flow analyzers. Options include automatic scale expansion, automatic baseline compensation, extension cables for cold-room use and choice of cuvette pathlengths. When ordered together, the Canalco 1205 and Wide-Track come with interconnecting cable for the Wide-Track's event marker pen.

Contact Canalco direct for full details on the Canalco 1205 Fraction Collector and Wide-Track Flow Monitor. Write or telephone:

**SCIENCE BOOKS: A Quarterly Review**

Published by AAAS since April 1965

An authoritative review and evaluation of new science and mathematics books

- for elementary school students
- for secondary school students
- for students in the first two years of college
- for teachers
- for adult readers

The reviews are based on critical evaluations by professional scientists, mathematicians, educators, engineers, members of the medical profession, children's literature specialists, and others. Each book is assigned for review to a specialist most competent to appraise it.

Each quarterly issue of approximately 64 pages contains critical annotations and recommendations on 200 or more science and mathematics books.
