Carotid Body Chemoreceptors: Physiological Role in Buffering Fall in Blood Pressure during Sleep: M. Guazzi, G. Baccelli, A. Zanchetti .......................... 206
“Sex-Ratio” Condition: Unusual Mechanisms in Bark Beetles: G. N. Lanier and J. H. Oliver, Jr. ................................................................. 208
Evoked Potential Correlates of Generalization: D. S. Ruchkin and E. R. John ................................................................. 209
Cerebral Concussion in the Monkey: An Experimental Model: A. K. Ommaya et al. ................................................................. 211

MEETINGS

A Mexican freetail bat (Tadarida brasiliensis mexicana) as it emerges from Carlsbad Caverns at dusk. The camera was timed by a signal from a photomultiplier tube when the bat intercepted a beam of light. See page 201. [Harold E. Edgerton, Massachusetts Institute of Technology]
