What To Do about ESP: E. G. Boring; Detroit Fluoride Conference: A. W. Burgstahler; Graduate Training in Astronomy: B. J. Bok.

Science Critics

Ancient Oriental Records of Novae and Supernovae: X. Ze-zong and P. Shu-jen.
Oases for the Future: K. Hickman

Biomedical Research Policy—Oklahoma Conference; 89th Congress—Rubber Stamp?; ONR London—Two Decades Quid pro Quo; Munitions List—Restrictions on International Exchange

Deep-Sea Iron Deposit from the South Pacific: E. Bonatti and O. Joensuu
Maya Blue: A Clay-Organic Pigment?: H. Van Olphen
Manganese Nodules: Thorium-230: Protactinium-231 Ratios: W. M. Sackett
Deep Layer of Sediments in Alpine Lake in the Tropical Mid-Pacific: A. H. Woodcock, M. Rubin, R. A. Duce
Monoamine Oxidase Activity in Various Parts of the Rat Brain during the Estrous Cycle: A. J. Zolovick et al.
Homoreactant: A Naturally Occurring Autoantibody in Rabbits: W. J. Mandy and L. C. Kormeter

SCIENCE is published weekly on Friday and on the fourth Tuesday in November by the American Association for the Advancement of Science, 1515 Massachusetts Ave., N.W., Washington, D.C. 20005. Now combined with The Scientific Monthly. Second-class postage paid at Washington, D.C. Copyright 1966 by the American Association for the Advancement of Science. Annual subscriptions $18.50; foreign postage $1.50; Canadian postage, 75¢; single copies, 55¢. Except Guide to Scientific Instruments, which is School year subscriptions: 9 months, $17.10 months, $17.50. Provide 4 weeks notice for change of address, giving new and old address and zip numbers. Send a recent address label. SCIENCE is indexed in the Reader's Guide to Periodical Literature.
Nonphosphorylating Respiration of Mitochondria from Brown Adipose Tissue of Rats: R. E. Smith, J. C. Roberts, K. J. Hittelman ............................................. 653
Antibody-Forming Cells: Population Patterns after Simultaneous Immunization with Different Isot antigens: R. A. McBride and L. W. Schierman ............................................. 655
Isozymes of Aldolase: H. B. Anstall, C. Papp, J. M. Trujillo ............................................. 657
Allomorphic Forms of Bacteriophage φX-174 Replicative DNA: T. F. Roth and M. Hayashi ............................................. 658
Reversal Response Elicited in Nonbeating Cilia of Paramecium by Membrane Depolarization: Y. Naitoh ............................................. 660
Arrested Protein Synthesis in Polysomes of Cultured Chick Embryo Cells: R. Soeiro and H. Amos ............................................. 662
Enhanced Growth of Human Embryonic Cells Infected with Adenovirus 12: I. V. Sultanian and G. Freeman ............................................. 665
Anteroventral Cochlear Nucleus: Wave Forms of Extracellularly Recorded Spike Potentials: R. R. Pfeiffer ............................................. 667
Acceleration of Uretal Peristalsis by Adrenal Compression: S. Boyarsky, P. Labay, N. Kirshner ............................................. 669
Deoxyribonucleic Acid in Germinal Vesicles of Oocytes of Rana pipiens: A. J. Haggis ............................................. 670
Replication of Adenovirus Type 7 in Monkey Cells: A New Determinant and Its Transfer to Adenovirus Type 2: J. S. Butel et al ............................................. 671
Liver Cancer: Neonatal Estrogen Enhances Induction by a Carcinogen: J. H. Weisburger et al ............................................. 673
Inhibition of the Carotid Sinus Reflex by Stimulation of the Inferior Olive: O. A. Smith, Jr., and M. A. Nathan ............................................. 674
Technical Comments: Reversal in Tactile and Visual Learning: G. B. Biederman ............................................. 677

Latin American Symposium on Catecholamines: R. J. Wurtman; Forthcoming Events ............................................. 680

COVER

Early 20th-century monoplane constructed by Louis Blériot, designer and aviator who made the first flight across the English Channel in 1909. Slow but reliable, the Blériot actually contained many design features of a far more advanced craft. See review of The Invention of the Aeroplane 1799–1909, page 635.
