BOOK REVIEWS
Experience and Conceptual Activity, reviewed by R. Palter; other reviews by
J. T. Kuo, R. Kingslake, R. J. Russell, E. F. C. Somerscales, P. F. Davison,
L. D. Gates, Jr., J. D. McCullough, A. B. Meinel and M. P. Meinel,
L. C. Young, L. Spruch: New Books ........................................................................ 1156

REPORTS
Stratigraphic Sections, Bedding Sequences, and Random Processes: D. D. Carr et al. . . 1162
Magnetic Anomalies over the Pacific-Antarctic Ridge:
W. C. Pitman III and J. R. Heirtzer ........................................................................ 1164
Copper Artifacts from Prehistoric Archeological Sites in the Dakotas:
W. E. Hill, Jr., and R. W. Neuman ........................................................................ 1173
Lithology and Paleontology of the Reflective Layer Horizon A:
T. Saito, L. H. Burckle, M. Ewing ........................................................................ 1179
Melting of Tin Telluride at High Pressures: W. Klement, Jr., and L. H. Cohen .......... 1178
Mars Ice Caps: C. Leovy .......................................................................................... 1179
Electrophoretic Variation of Galactose-1-Phosphate Uridytransferase:
C. K. Mathai and E. Beutler ..................................................................................... 1179
Magnesium-28 in Rain: Produced by Cosmic Rays: L. Husain and P. K. Kuroda

Intracellular Absorption Difference Spectrum of Limulus Extra-Ocular Photolabile Pigment: G. C. Murray

Periventricular Cerebral Impedance after Intraventricular Injection of Calcium: H. H. Wang et al.

Electron Microscopy of Living Insects: R. F. W. Pease et al.

Establishment of Four Functional, Clonal Strains of Animal Cells in Culture: Y. Yasumura, A. H. Tashjian, Jr., G. H. Sato

Germination of Witchweed (Striga inae Lour.): Isolation and Properties of a Potent Stimulant: C. E. Cook et al.

Low-Noise, Interference-Resistant Amplifier Suitable for Biological Signals: G. Schuler, G. Park, J. P. Erul

Noncollagenous Nature of the Proteins of Shark Enamel: P. T. Levine et al.

Periodicity of Desert Rodent Activity: N. R. French, B. G. Maza, A. P. Aschwanden

Holomicrography: Transformation of Image during Reconstruction a posteriori: G. W. Ellis

Evidence from Cultured Leucocytes of Blood Cell Chimerism in Ex-Parabiotic Frogs: E. P. Volpe and B. M. Gebhardt

Simple Photoreceptors in Limulus polyphemus: R. Millecchia, J. Bradbury, A. Mauro

Visual Spatial Aftereffect from Prolonged Head Tilt: R. H. Day and N. J. Wade

Segregation of Sister Chromatids in Mammalian Cells: K. G. Lark, R. A. Consigli, H. C. Minocha

Rapid and Marked Inhibition of Rat-Liver RNA Polymerase by Aflatoxin B1: H. V. Gelboin et al.

Deficits in Passive Avoidance and Fear Conditioning in Mice with Septal Lesions: B. M. Slatnick and M. E. Jarvik

Technical Comment: Sensitivity of Cardiac Actomyosin to Calcium: B. L. Fanburg

COVER

This diatom was originally recorded as a holomicrogram of a bright-field microscope image which was transformed, after the fact, into interferometric phase-contrast and other types of microscope image. This procedure demonstrates the potential of holography as a means for freezing in time a transient event for subsequent examination by a variety of optical techniques. See page 1195. [Gordon W. Ellis, Dartmouth Medical School, Hanover, New Hampshire]
