Anthropology—Concern about Foreign Research; 200-Bev Accelerator—Illinois Site Selected; Federal Laboratories—Are they Adjusting to Changing Needs? Scholars' Center—A Capitol Idea

BOOK REVIEWS
Elements of Psychophysics, reviewed by J. A. Swets; other reviews by A. Etzioni, E. Staley, H. S. Gutowsky, C. Wilson, J. M. Mitchell, Jr., R. R. Coats, J. D. Buddhue, G. W. Murphy; New Books

REPORTS
Deep-Sea pH: K. Park
Calcite: Rates of Dissolution in a Vertical Profile in the Central Pacific: M. N. A. Peterson
Isotopic Composition and Origin of the Red Sea and Salton Sea Geothermal Brines: H. Craig
Fluorine Content of Microsaur Teeth from the Carboniferous Rocks of Joggins, Nova Scotia: J. S. Stevenson and L. S. Stevenson
Sedimentary Environments in a Marine Marsh: F. B. Phleger and J. S. Bradshaw
Electrode for Sensing Fluoride Ion Activity in Solution: M. S. Frant and J. W. Ross, Jr.
Sonic Detection of a Fresh Water–Salt Water Interface: H. E. Edgerton
Ice Nuclei from Automobile Exhaust and Iodine Vapor: V. J. Schaefer
Puromycin and Cycloheximide: Different Effects on Hippocampal Electrical Activity: H. D. Cohen, F. Ervin, S. H. Barondes .......................... 1557
Naturally Occurring Primate Hybrid: I. S. Bernstein .......................... 1559
Solution Photochemistry of Thymine and Uracil: A. A. Lamola and J. P. Mittal .......................... 1560
Evolution of Immunoglobulin Polypeptide Chains: Carboxy-Terminal of an IgM Heavy Chain: R. F. Doolittle, S. J. Singer, H. Metzger .......................... 1561
Polypeptide Chains of Immunoglobulins from the Smooth Dogfish (Mustelus canis): J. Marchalonis and G. M. Edelman .......................... 1567
Initial and Resultant Population Densities in Chickens between Brooding and Sexual Maturity: G. L. Mangan and M. G. King ........................................................ 1568
Respiratory Control: Loss in Mitochondria from Diseased Plants: H. Wheeler and P. J. Hanchey ........................................................ 1569
Chromosomal Polymorphism in the White-Throated Sparrow, Zonotrichia albicollis (Gmelin): H. B. Thorneycroft ............................................. 1571
Control of the Activity of Escherichia coli Carbamoyl Phosphate Synthetase by Antagonistic Allosteric Effectors: A. Pierard .................................................. 1572
Brain Sensitivity to Alcohol in Inbred Mouse Strains: R. Kakihana et al. .................................................. 1574
Cytochemistry of Synapses: Selective Staining for Electron Microscopy: F. E. Bloom and G. K. Aghajanian .................................................. 1575
Open-Field Behavior in Mice: Evidence for a Major Gene Effect Mediated by the Visual System: J. C. DeFries, J. P. Hegmann, M. W. Weir .................................................. 1577
Entrainment of Circadian Rhythms by Sound in Passer domesticus: M. Menaker and A. Eskin .................................................. 1579
Visual Adaptation: Increased Efficiency Resulting from Spectrally Distributed Mixtures of Stimuli: R. M. Boynton and S. R. Das .................................................. 1581
Pupil Diameter and Load on Memory: D. Kahneman and J. Beatty .................................................. 1583
Tryptophan Operon of Escherichia coli: Regulatory Behavior in Salmonella typhimurium Cytoplasm: R. L. Somerville .................................................. 1585

MEETINGS

Air Pollution Medical Research: J. R. Goldsmith; Antimicrobial Agents and Chemotherapy: D. Perlman .................................................. 1588

COVER

Ice crystals formed on submicroscopic particles of lead, from automobile exhaust, on exposure of the particles to a trace of iodine vapor while in a supercooled cloud at −15°C. There are more than 1 million such nuclei per liter. The largest crystal is 170 microns in diameter. See page 1555. [Vincent J. Schaefer, Atmospheric Sciences Research Center, State University of New York]
