

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

Reformation of Functional Liver Polyribosomes from Ribosome Monomers in the Absence of RNA Synthesis: <i>G. A. Stewart and E. Farber</i>	67
Adenovirus Endocarditis in Mice: <i>Z. R. Blailock, E. R. Rabin, J. L. Melnick</i>	69
Cell Aggregation: Its Enhancement by a Supernatant from Cultures of Homologous Cells: <i>J. E. Lilien and A. A. Moscona</i>	70
Hematuria Following Administration of Ethanol: <i>J. M. Orten, K. C. Shrivastava, M. Shih</i>	72
Isoprenoid Biosynthesis in a Cell-Free System from Pea Shoots: <i>J. E. Graebe</i>	73
Benzpyrene Hydroxylase Induction by Polycyclic Hydrocarbons in Hamster Embryonic Cells Grown in vitro: <i>L. J. Alfred and H. V. Gelboin</i>	75
Carbon-14 and Tritium Measurement by Means of Bremsstrahlung Emissions: <i>J. C. Rosen, G. R. Laurer, M. Eisenbud</i>	77
Genetic Mapping of Phenylalanyl-tRNA Synthetase in <i>Escherichia coli</i> : <i>A. Böck and F. C. Neidhardt</i>	78
Chenopod and Amaranth Pollen: Electron-Microscopic Identification: <i>M. Tsukada</i> ..	80
Enzymatic Identification of Fish Products: <i>A. C. Wilson, G. B. Kitto, N. O. Kaplan</i> ..	82
Structural Basis for the Inhibition of Protein Biosynthesis: Mode of Action of Tubulosine: <i>A. P. Grollman</i>	84
Sex Attractant of the Black Carpet Beetle: <i>R. M. Silverstein et al.</i>	85
Cocoon Surrounding Desert-Dwelling Frogs: <i>A. K. Lee and E. H. Mercer</i>	87
Frequency Sensitivity of Single Auditory Neurons in the Gecko <i>Coleonyx variegatus</i> : <i>N. Suga and H. W. Campbell</i>	88
Receptive Fields in the Cat Retina: A New Type: <i>R. W. Rodieck</i>	90
The (\pm) Reference: Accuracy of Estimated Mean Components in Average Response Studies: <i>H. Schimmel</i>	92
Electrocortical Correlates of Stimulus Response and Reinforcement: <i>K. H. Pribram, D. N. Spinelli, M. C. Kamback</i>	94
Pemoline and Magnesium Hydroxide: Lack of Effect on RNA and Protein Synthesis: <i>H. H. Stein and T. O. Yellin</i>	96
Animals at Very High Pressures of Helium and Neon: <i>K. W. Miller et al.</i>	97
<i>Technical Comments: Radar Observations of Locust Swarms: R. C. Rainey; Seal Ears: B. Møhl; Pollution in the Great Lakes: W. E. Howland</i>	98

MEETINGS Biological Nitrogen Fixation: *W. S. Silver*; Retirement Crisis: *F. M. Carp* **100**

COVER

(Top) White-tailed tropic bird, *Phaethon lepturus lepturus*; (lower left) adult sacred ibis, *Threskiornis aethiopicus abbotti*; and (lower right) juvenile red-footed booby, *Sula sula rubripes*. These birds are among the hundreds of species of animals and plants whose habitat may be destroyed if plans proceed for establishing a communications center on the island of Aldabra, northwest of Madagascar. Among the animals affected would be the almost extinct giant land tortoise. See page 8. [Roger Gaymer, University of Bristol, Bristol, England]
