March

18–21. American Radium Soc., annual mtg., Miami Beach, Fla. (J. L. Pool, Executive Secretary, Memorial Hospital, 444 E. 68 St., New York, N.Y.)

18–22. National Assoc. of Corrosion Engineers, 24th annual conf. and show, Cleveland, Ohio. (T. J. Hull, 980 M & M Building, Houston, Tex. 77002)

19–20. Equipment Manuals Symp., Washington, D.C. (National Security In-

...in See Sharp! Two minds working together for better teaching, faster learning. It’s a double-viewing head with built-in measuring pointers. Student and teacher or two students see the same specimen simultaneously. Both see with advanced Wide Field Zoom, too. Both see the image always in focus as you zoom through a continuously variable range of powers from 100× to 500×. You see at the right magnification. It’s an exciting, dramatic show for students and teachers. You get it only with the Bausch & Lomb Academic 255 High School/College Microscope. Write for complete information in our new Catalog No. 31-2172. Bausch & Lomb, 77403 Bausch Street, Rochester, New York 14602.
industrial Assoc., 1030 15th St., NW, Washington, D.C. 20005)
19-21. American Railway Engineering Assoc., Chicago, Ill. (E. W. Hodgins, Executive Secretary, 59 E. Van Buren St., Chicago 60605)
20. Suicidology, 1st natl. conf., Chicago, Ill. (E. S. Sheideman, Center for Studies of Suicide Prevention, National Inst. of Mental Health, 4545 Wisconsin Ave., Chevy Chase, Md. 20020)
20-22. Institute of Management Sciences, Atlanta, Ga. (E. T. Alsaker, Lockheed-Georgia Co., Dept. 88-la, Zone 283, Marietta, Ga. 30060)
20-22. Progress in Operable Heart Disease, American College of Cardiology, New York, N.Y. (W. D. Nelligan, Executive Director, 9650 Rockefeller Pike, Washington, D.C. 20014)
21-22. Modulation Transfer Function, Boston, Mass. (Society of Photo-Optical Instrumentation Engineers, P.O. Box 288, Redondo Beach, Calif. 90277)
21-23. Symp. on Microwave Power, 3rd symp., Boston, Mass. (C. Olsen, % Eimac, Division of Varian Assoc., 301 Industrial Way, San Carlos, Calif. 94070)
21-24. Radiographic Diagnosis of Head and Neck, Miami Beach, Fla. (L. R. Kelley, Dept. of Radiology, Jackson Memorial Hospital, Miami, Fla.)
22-23. Montana Medical Assoc., Helena. (L. R. Hugdahl, The Association, P.O. Box 1692, Billings, Mont. 59105)
22-23. Socio-Economics of Health Care, 2nd natl. congr., Chicago, Ill. (H. W. Doan, Dept. of Health Care Services, American Medical Assoc., 535 N. Dearborn St., Chicago 60610)
22-27. California Medical Assoc., San Francisco. (R. L. Thomas, 693 Sutter St., San Francisco 94102)
23. New Jersey Post Graduate Anesthesia Seminar, 9th annual, Cherry Hill. (P. A. Tucci, 22 The Fairway, Upper Montclair, N.J. 07043)
23-24. Missouri Soc. of Anesthesiologists, Kansas City. (G. W. N. Eggers, Jr., Univ. of Missouri Medical Center, Columbia 65201)
24-27. American Assoc. of Dental Schools, 45th annual session, San Francisco, Calif. (D. E. Mattson, 211 E. Chicago Ave., Chicago, Ill. 60611)
24-29. American College of Allergists, 24th annual congr., Denver, Colo. (E. Bauers, 2160 Rand Tower, Minneapolis, Minn. 55402)
24-30. American Soc. of Clinical Pathologists, New Orleans, La. (L. H. Hoyt, Methodist Hospital, Indianapolis, Ind.)

**CELL PRODUCTION ROLLER APPARATUS**

FOR PRODUCTION OF LARGE VOLUMES OF CELLS AND VIRUSES IN MONOLAYER CELL CULTURES.

1. Convenience . . . eliminates handling large numbers of stationary bottle cultures to obtain equivalent number of cells. Less handling also reduces chance of contamination.

2. Solid state variable speed control.

4. Higher yields of cells per unit volume particularly in cultures of established cell lines.

5. Better yields of virus per unit volume because of increased cell population density.

6. Higher virus concentration per unit volume of media.

Diaflo®
ULTRAFLTRATION

Now in use in hundreds of research and clinical laboratories, the reliable, highly efficient DIAFLO system is built around a new class of synthetic polymer membranes exhibiting extremely high water flow rates and controllable solute retention characteristics with molecular cutoffs at 500, 1,000, 10,000 and 50,000 M.W. The DIAFLO Membranes are non-denaturing, non-plugging and reusable. Taking full advantage of these unique properties, Amicon has also developed a series of compact Ultrafiltration Cells and accessories which produce systems handling volumes from 1 ml. to 12 liters.

Write or call collect for free DIAFLO Catalog of detailed product and application data.

Distilled water has never looked so good!

Take an electrically heated still that produces 2 gallons per hour of 800,000-ohms pure distilled water (2½ times purer than that used in most laboratories)! . . .

Add a storage tank that stores 10 gallons and protects it from contamination . . . keeps it ready for instant use.

Wrap them up with convenient, foolproof controls and indicators in a sleek, modern cabinet that fits almost anywhere . . .

You'll have the new Barnstead Two-Ten Laboratory Distilled Water Center!

It's one of Barnstead's latest developments to help you put distilled water on tap safely, economically and easily.

Contact your laboratory supply dealer for details or write to Barnstead.

It's the new

The new range of EMI photomultipliers with "SUPER" S-11 photocathodes will enhance your project performance. High quantum efficiency, (23/24%) high gain at relatively low overall voltage, and low dark current at the rated overall sensitivity are typical of these types. They maintain the EMI standard of excellent gain stability and linearity. The narrow spread in characteristics makes these types ideal for systems or for multiple installations. The table below gives the typical values for the significant parameters.

<table>

18–19. American Assoc. of Railway Surgeons, Houston, Tex. (C. Y. Werelus, 5800-3 Stony Island Ave., Chicago, Ill. 60637)

19–20. Ohio Acad. of Science, 77th annual, Bowling Green, Ohio. (J. H. Melvin, 501 King Ave., Columbus, Ohio)

19–21. Cooper Ornithological Soc., Salt Lake City, Utah. (W. H. Behie, 203 Biology Building, Univ. of Utah, Salt Lake City 84112)

20–25. American Ceramic Soc., 70th annual, Chicago, Ill. (R. S. Sheldon, 4055 N. High St., Columbus, Ohio 43214)

If you can write the problem...

you already know how to use the Mathatron

It's as simple as that... No sequencing, no tucking away of intermediate results in storage registers to be recalled later, no strange hieroglyphics or mixed-up mathematical symbols... Just the linear equation written with the keyboard exactly as you would with a pencil.

And with this unique ease of operation, Mathatron also gives you a programmable memory, the ability to learn and automatically work a complex formula, a true full floating decimal point, a power-of-ten exponent which extends the number range to 100 digits and a serial tape with a printed record of the problem as you write it with the keys, and the solution.

Mathatron is a truly unique and wonderful electronic mathematical machine and much, much more than just a calculator. Get the details today.

21–24. American Orthopaedic Assoc., Boca Raton, Fla. (S. W. Banks, Executive Secretary, 29 E. Madison St., Chicago, Ill. 60602)

New AAAS Symposium Volumes

FORMULATION OF RESEARCH POLICIES  September 1967

Editors: Lawrence W. Bass and Bruce S. Old
218 pp., tables, illus., 6 x 9, cloth. $7.75.
AAAS members' cash orders: $6.25.
A collection of papers, presented at the Gordon Research Conference held in Santa Barbara, California, in 1966, analyzing and describing past and present science policies at national, international, and corporate levels.

MOLECULAR MECHANISMS OF TEMPERATURE ADAPTATION  July 1967

Editor: C. Ladd Prosser
398 pp., 41 tables, 127 illus., bibliogr., index, 6 x 9, cloth. $12.50.
AAAS members' cash orders: $10.50.
Papers by 24 contributors on the general physiology of genetic and environmentally induced temperature adaptation in cold-blooded animals, plants, and microorganisms.

ESTUARIES  January 1967

Editor: George E. Lauff
776 pp., 85 tables, 525 illus., bibliogr., index, 7½ x 10½, cloth. $27.00.
AAAS members' cash orders: $24.00.
Definitive volume on estuarine research: physical factors, geomorphology, sedimentation, microbiota, nutrients, biological productivity, ecology, physiology and evolution, fisheries, human influences, and pollution.

With this steady flow HOLTER™ pump
you can handle six channels simultaneously
at different rates (0.3-14,580 ml/hr)

The MC 721 Holter pump offers chemists, physiologists, engineers and other workers the greatly increased versatility of pumping six discrete channels at linearly related rates.

Two head speed ranges provide optimum control of pumping rates. Within each range, speed is infinitely variable. Pumping accuracy is ± 1%. Delivery volume vs. pressure curves are flat up to 290 mm Hg positive pressure and 200 mm Hg vacuum.

Mirror finish silicone pumping chambers eliminate elastomer hysteresis, making the MC 721 suitable for high precision work. Chambers of four different ID’s are furnished. They are autoclavable, and have a useful life of up to 2,000 hours.

Anisotropic occlusion of the chambers by the Holter roller head prevents “dribble,” yet guards against system blowout and motor overload in case of inadvertent fluid line blockage. Flows are virtually non-pulsatile.

Write or call today for informative brochure and prices on the versatile MC 721 pump, and on other pumps and devices from Extracorporeal.

New MINER* mini-price full-size cold rooms.

Hotpack's dramatic new concept in low-cost, high performance MINER* walk-in cold rooms are engineered for easy installation and use! For your added convenience, two low temperature ranges are available: +4°C and -20°C, each giving efficient single temperature operation. Solid state ACCUMAT® temperature control assures control sensitivity ±0.01°C in either range! Construction is sleek and modern providing maximum interior load space. Sturdy sectionalized panel construction, with urethane insulation, provides smooth, unobstructed walls and more useable work area where it counts—in the room! This advanced design permits easy, inexpensive assembly. The compact, self-contained refrigeration system is delivered ready for operation. Conditioning units and air blowers are mounted to the ceiling so that uniform air circulation of ±0.5°C is assured throughout the room. And most important, you have a choice of sizes ranging from 6' to 12' in width and 4' to 14' in depth. Added together, your best buy in 1968 is a Hotpack MINER* cold room!

SAGE thermistor-controlled air curtain incubator maintains specimen temperature within $\pm 0.2^\circ C$.

The Sage Air Curtain Incubator controls the temperature of specimens under the microscope within the range of 30° to 40°C with an accuracy of $\pm 0.2^\circ C$. It totally eliminates the need for enclosures of any kind—microscope and specimen are completely accessible. Especially useful for biological studies of living materials.

In operation, the Sage Air Curtain Incubator blows a soft stream of warm or ambient temperature air on the specimen as demanded by a thermistor. It maintains specimen temperature to much closer tolerances over longer periods of time than those that can be achieved by conventional incubators. Accurate, reproducible, convenient. Send for complete technical data.

SPORES - FERNS
MICROSCOPIC ILLUSIONS
ANALYZED
Vol. I  C. S. HIRES

An inspiring, valuable book for nature lovers, artists and scientists in many fields . . .

Living ferns beautifully illustrated, cell structure, development—spore to maturity. Unique, 3-dimensional studies. Models, line drawings and photomicrographs clarify spore structure, with wall arrangements organized.

New approaches to microscopic illusions. Simple, accurate terms.

572 pages, 1150 illustrations, 14 in color.
