which contribute to the selectivity for certain neoplasms of drugs known to inhibit this enzyme (C. A. Nichol, Roswell Park Memorial Institute). Drug sensitivity is related to capacity for cellular uptake of amethopterin in tumor systems, and tissues vary with respect to the tetrahydrofolate-requiring pathways most vital to their growth.

The formation of tetrahydrofolate by dihydrofolate reductase is subject to intricate regulatory control (J. J. Burchall, Wellcome Research Laboratories). Since the formation of purines and pyrimidines is extensively controlled, the presence of an additional set of regulatory devices in the folate pathway may function to divert a limited supply of the coenzymes to the critical requirements of the cell. In human leukemia, folate metabolism provides an attacking point to rational chemotherapy (J. R. Berrino, Yale University). In man, an increase in dihydrofolate reductase accompanies treatment with methotrexate in both normal and leukemic leucocytes, and in erythrocytes, within a few days after treatment is started. This increase of enzyme activity with methotrexate represents a type of cofactor induction.

C. G. Smith (Quibb Institute for Medical Research) analyzed the role of cyclic adenosine monophosphate (AMP) in metabolic regulation. Evidence implicating cyclic AMP in a variety of hormone actions was outlined by R. W. Butcher (Vanderbilt University), who compared these results with the effects of cyclic guanosine monophosphate (GMP), which is the only other cyclic 3',5'-nucleotide identified in nature. The two nucleotides differ with respect to hormonal factors (hypophysectomy, thyroideectomy, adenalecctomy, and administration of thyroxine, hydrocortisone, or glucagon), which alter their excretion in the urine.

Glucogenogenesis from lactate in the perfused liver is stimulated by glucagon and catecholamines, an effect which appears to be mediated by cyclic AMP. Insulin deficiency causes an elevation of cyclic AMP in the liver in vivo, which can be reversed by insulin treatment (J. H. Exton, Vanderbilt University).

The hormonal and nonhormonal control of glycogen synthesis depends on the regulation of transferase phosphatase and kinase (J. Larner, University of Minnesota). The two forms of the transferase enzyme are interconverted by enzymes which catalyze the phosphorylation and dephosphorylation of the two forms of transferase. The site of the nonhormonal control of glycogen synthesis is identified as the phosphatase, whereas the site of the hormonal control by insulin and epinephrine is the kinase.

In the direction and magnitude of its response to glucose and insulin, rat liver adenylate kinase resembles the key glucogenogenic enzymes, whose activities are decreased by insulin administration (S. Weinhouse, Temple University). This newly discovered control of adenylate kinase may have a regulatory effect on glucogenogenesis.

Y. Miura (Chiba, Japan) reported that DNA-dependent RNA polymerase is found both in chromatin and nucleolar fractions of normal rat liver cells, as well as in rat ascites hepatoma cells. Nucleolar RNA polymerase was more sensitive than chromatin RNA polymerase to the administration of steroid hormone. In hepatoma cells, chromatin RNA polymerase was rather insensitive to the steroid hormone. The important problem of energy regulation in rat liver and hepatomas was explored by S. Weinhouse. He pointed out that if competition for adenosine diphosphate (ADP) plays a part in regulating glycolysis in hepatomas, the low activities of pyruvate kinase in the well-differentiated tumors should favor utilization of ADP by the respiratory acceptor system, and this would lower glycolysis further. In contrast, the high pyruvate kinase levels of the poorly differentiated, rapidly growing tumors should favor preferential utilization of ADP by this enzyme and this should enhance glycolysis. He suggested that the characteristically high glycolytic activity of the rapidly growing tumors may in general be attributable to low levels of respiratory ADP acceptor system in combination with high pyruvate kinase activity.

The symposium was sponsored by Indiana University School of Medicine, Burroughs Wellcome and Co., Hoffmann-LaRoche, Eli Lilly and Co., Merck Sharp & Dohme, Squibb Institute for Medical Research, and the Upjohn Co. The full text of the papers, edited by the chairman of the conference, George Weber, will be published in the spring of 1968 as volume 6 of Advances in Enzyme Regulation (Pergamon Press). Volumes 1 through 5 of this series of conferences on enzyme regulation in mammalian systems presented the proceedings of the previous five symposia.

George Weber

Calendar of Events

National Meetings

April

20–25. American Ceramic Soc., 70th annual, Chicago, Ill. (R. S. Sheldon, 4055 N. High St., Columbus, Ohio 43214)
21–24. American Orthopaedic Assoc., Boca Raton, Fla. (S. W. Banks, Executive Secretary, 29 E. Madison St., Chicago, Ill. 60602)
21–25. American Assoc. of Cereal Chemists, 53rd annual, Cincinnati, Ohio, (Executive Secretary, The Association, 1955 University Ave., St. Paul, Minn. 55104)
22–24. Association of Iron and Steel Engineers, spring conf., St. Louis, Mo. (Managing Director, The Association, 1010 Empire Building, Pittsburgh 22, Pa.)
22–25. American Assoc. of Petroleum Geologists, Oklahoma City, Okla. (E. P. Kerr Jr., Mobil Oil Co., Box 1828, Oklahoma City 73101)
22–27. American Acad. of Neurology, 20th annual, Chicago, Ill. (S. A. Nelson, 4005 W. 65 St., S., Minneapolis, Minn.)
22–10. Laboratory Methods in Medical Parasitology, Atlanta, Ga. (U.S. Public Health Service, National Communicable Disease Center, Atlanta 30333)

22–24. Relay Conference, 16th annual, Stillwater, Okla. (D. R. Wilson, School of Electrical Engineering, Stillwater 74074)

23–25. Institute of Electrical and Electronics Engineers, New Orleans, La. (R. M. Emberson, 345 E. 47 St., New York 10017)

24–26. Space Age Facilities, 2nd conf., Los Angeles, Calif. (W. H. Wisely, American Soc. of Civil Engineers, 343 E. 47 St., New York 10017)

25–27. American Cleft Palate Assoc., Miami Beach, Fla. (D. R. Bzoch, Dept. of Communicative Disorders, College of Health Related Professions, Univ. of Florida, Gainesville 32603)

25–27. Molecular Basis of Odor, San Francisco, Calif. (Letters and Science Extension, Univ. of California, 2223 Fulton St., Berkeley 94720)

25–27. Wildflower Pilgrimage, 18th annual, Gatlinburg, Tenn. (Dept. of Botany, Univ. of Tennessee, Knoxville 37916)

26–27. Biochemical Co-evolution, 29th annual biology colloquium, Corvallis, Ore. (W. C. Denison, Box 689, Corvallis 97330)

26–27. Comparative Endocrinology, northeast regional mtg., Boston, Mass. (N. B. Clark, Biological Sciences, Univ. of Connecticut, College of Liberal Arts and Sciences, Storrs 06268)

26–27. Indiana Acad. of Science, Wabash. (J. R. Gammon, Dept. of Zoology, DePauw Univ., Greencastle, Ind. 46135)

26–28. Wisconsin Acad. of Sciences, Arts and Letters, Eau Claire. (A. Suppan, School of Fine Arts, Univ. of Wisconsin-Milwaukee, Milwaukee)
26-30. Industrial Gas Cleaning Inst., 9th annual meeting, Point Clear, Ala. (H. R. Herington, Executive Secretary, Industrial Gas Cleaning Inst., Inc., Box 448, Rye, N.Y. 10580)

27. American Medical Electroencephalographic Assoc., Chicago, Ill. (M. L. Tower, Secretary-Treasurer, 200 University Boulevard, Galveston, Tex. 77550)

27-28. Ceramic Engineers, Chicago, Ill. (F. Reid, American Ceramic Soc., 4055 N. High St., Columbus, Ohio)

28. American Assoc. of Electromyography and Electrodiagnosis, 15th annual, Chicago, Ill. (E. W. Johnson, Secretary-Treasurer, 410 W. 10, Columbus, Ohio 43210)

28-1. American Assoc. of Plastic Surgeons, Houston, Tex. (C. W. Monroe, 715 Lake St., Oak Park, Ill. 60301)

28-1. Fluid Controls Inst., Inc., spring meeting, Hot Springs, Va. (The Institute, P.O. Box 1485, Pompano Beach, Fla. 33061)

28-29. Combustion Inst., western states section spring mtg., Pasadena, Calif. (G. S. Bahn, 16902 Bollinger Drive, Pacific Palisades, Calif. 90272)

29-30. Environmental Health Problems, 5th congr., Chicago, Ill. (AMA Dept. of Environmental Health, 535 N. Dearborn St., Chicago 60610)

29-1. Association for Research Ophthalmology, Tampa, Fla. (H. E. Kaufman, Dept. of Ophthalmology, Univ. of Florida College of Medicine, Gainesville 32601)

29-1. Dose Rate in Mammalian Radiation Biology symp., Oak Ridge, Tenn. (D. G. Brown, UT-AEC Agricultural Research Lab., 1299 Bethel Valley Rd., Oak Ridge 37830)

29-1. Institute of Environmental Sciences, annual technical mtg. and equipment exposition, St. Louis, Mo. (H. F. Sander, 940 E. Northwest Highway, Mount Prospect, Ill.)

29-1. Plant Engineering and Maintenance Conf., Kansas City, Mo. (A. B. Conlin, Jr., Meetings Manager, 345 E. 47 St., New York 10017)

29-2. American Acad. of Pediatrics, New Orleans, La. (E. H. Christopherson, Executive Secretary, 1801 Hinman Ave., Evanston, Ill. 60204)

You mean I can get $50,000 of TIAA Life insurance for less than $100?

That’s what an Assistant Professor asked us when he heard about TIAA’s low life insurance costs.

It’s true. At his age 30 the annual premium for a 20-Year Home Protection policy providing $50,000 initial amount of insurance is $159.00. The first year dividend, based on our current dividend scale, is $61.00, making a net payment of $98.00. Dividends, of course, are not guaranteed.

The Home Protection plan is level premium Term insurance providing its largest amount of protection initially, reducing by schedule each year to recognize decreasing insurance needs. This is just one example of the many low-cost TIAA plans available. If you need more protection for your family, ask us to mail you a personal illustration with figures for a policy issued at your age. We’ll also send the Life Insurance Guide describing other TIAA policies.

ARE YOU ELIGIBLE FOR TIAA?

Yes, if you are employed by a college, university, private school or other nonprofit educational or scientific institution that qualifies for TIAA eligibility.

TEACHERS INSURANCE AND ANNUITY ASSOCIATION
730 Third Avenue, New York, N. Y. 10017

Please mail the new Life Insurance Guide and a personal illustration.

Photovolt has basic pH meters to meet every acid test.

At the top of the scale, Digicord, meticulously made and full-featured, with digital readout, expanded scale precision, solid state circuitry (accuracy, repeatability and stability within ±0.002 pH). Photovolt's compact, durable new Digicord, priced well below its performance. $445.00

Plus the famous "Set and Forget" meters:
Model 126A, our portable heavy duty blue ribbon workhorse offers sealed waterproof construction to operate under the worst ambient conditions $335.00

Need low cost reliability? Buy 85A, using AC or battery. Single range 0-14, 3½" scale readable to 0.05 pH. Solid state; fully stabilized. Budget priced: $149.00

A full line of Photovolt pH meters are available. Send now for complete data.

Complete 10 MHz IC shift register at $10.50 per stage

M-208 is an 8-stage digital logic shift register, complete. It, like all 25 modules in the M Series, works at 10 MHz. And it, like all other modules in the series, is designed for a cost/performance ratio that is the best in the industry. The M-208 sells for $84, unless you buy large quantities. Then it's less.

M-208 control lines are buffered, eliminating complex loading rules. Provision is made for parallel loading of bits. TTL integrated circuits, the latest and best available, are used exclusively. Typical dc noise margin is 1 volt at either logic 1 or logic 0 levels.

M Series modules, including the M-208, and several other series of compatible modules, are fully described in the new Logic Handbook. Write for a free copy.
CZECHOSLOVAK JOURNAL OF PHYSICS

Full information and sample copy available upon request.

What's black and white and red all over?

Green, yellow and blue, too?

Kap-uts, that's what. The disposable culture tube closures now available in six colors ... instantly color code your investigations.

Kap-uts, made of non-toxic polypropylene, so low in cost you throw them away after a single use ... yet so well made, they are autoclavable.

Kap-uts have the same evaporation, viability and sterility characteristics of our famous stainless steel culture tube closures — but at 1/10 the price. At these prices, the way to order Kap-uts is by the thousands ... or millions!

Look to Blackstone for total ultrasonics flexibility in the laboratory.

1. Blackstone Hi-Intensity Probes. A new series of ultrasonic probes with a tremendous increase in power ranging from 100 to 1,000 watts for broader research and production potential. A selection of interchangeable tips permits versatile application of ultrasonic energy for minute cleaning, metal deformation, emulsification, and many other uses. Equipment is readily portable and may be used in any convenient position. Rugged magnetostrictive transducer.

2. Blackstone HT Series. Provides the right combination of tank size, power output and temperature to meet daily “on-the-bench” cleaning needs. Tank sizes can be furnished with 72, 144 and 216 square inches of cleaning area. Power outputs can be 100, 200, 300, 500 and 1000 watts and can be controlled from 0 to 100% for maximum cleaning efficiency without affecting the part to be cleaned. Temperature is thermostatically controlled from ambient to 190 degrees F.

3. Blackstone U-20 Cell Disrupter. A highly flexible unit designed for routine continuous or batch processing of cell suspensions, chemicals and solutions common to research in biochemistry, cytology, microbiology and related fields. Laboratory tests show that employing a 70 ml volume of a 20% suspension of Escherichia coli, 98% disruption was achieved in 12 minutes with no loss of activity in enzyme Beta Galactosidase. 0 to 100% power control for complete processing flexibility.

Give us a sample of your work. We’ll analyze anything you’re cleaning and make recommendations—at no charge, of course.

Studies of living materials at time lapse and normal speeds

The Sage Series 100 Cinemicrography system offers you everything you need for taking sharp, clear motion pictures that are free of artifacts. For studies of living cells and other slow-moving materials, you can take time lapse pictures at framing rates from 1 every 2 minutes to 64/min. A unique point source xenon flash provides illumination, up to 800 watt-sec per minute, repeatable 64 times per minute. Permits taking maximum resolution pictures at the highest magnifications. Protects your specimen from undesirable heat or light.

For studies of blood flow or other fast-moving materials, you can take pictures at rates from 1 every 2 sec to 64/sec with steady source illumination.

The Series 100 system excludes external vibration, insures sharp individual frames and perfect frame-to-frame register. The viewing telescope permits observation while pictures are being taken. Temperature control (optional) for your specimen is provided by either the plexiglas incubator shown or the unique Sage Air Curtain Incubator.

If you're interested in learning more about the finest systems made for taking motion pictures through the microscope, write or call for full particulars.
Catalog of Enzymes for Research from Worthington

A new 20-page booklet, "Worthington Enzymes for Research," covers all products offered by Worthington Biochemical Corporation: enzymes for research, specially purified enzymes, related microbial products; and enzymatic reagents.

We manufacture virtually all our products, carrying them from raw materials through processing, purification and packaging. This gives you important guarantees of product reliability, integrity and purity. It also gives you direct contact with our personnel directly responsible for preparing any particular batch of material.

Use the attached coupon to request your copy of the catalog.

4-9. International Acad. of Proctology, annual mtg., Montreux, Switzerland. (A. J. Canto, Secretary, The Academy, 147—41 Sanford Ave., Flushing, N.Y. 11355)

5-11. Combustion Engines, 8th intern. congr., Brussels, Belgium. (Federation des Entreprises de l’Industrie des Fabrications Metalliques, 21, rue des Drapiers, Brussels 5)

6-7. Canadian Aeronautics and Space Inst., annual general meeting, Toronto, Ont., Canada. (Secretary, The Institute, Room 704, 77 Metcalfe St., Ottawa 4, Ont.)

6-10. Electro-Deposition and Metal Finishing, 7th intern. conf., Berlin, Germany. (Deutsche Gesellschaft fur Galvanotechnik, Postfach 10026, 4000 Dusseldorf 10, Germany)

6-20. Biological Organization on a Molecular Level, Rehovoth, Israel. (M. Sela, Office of the President, Weizmann Inst. of Science, Rehovoth)

7-10. Powder Metallurgy, 2nd European symp., Stuttgart, Germany. (Ausschuss fur Pulvermetallurgie, Breite Str. 27, Dusseldorf, Germany)

8-10. Genetics Soc. of Canada, annual mtg., Winnipeg, Manitoba, Canada. (K. W. Buchannon, Research Station, CDA 25 Dafoe Road, Winnipeg 19)

8-10. Thyroid Cancers, intern. conf., Lausanne, Switzerland. (G. Candardjis,

What in the world are you doing with a Brinkmann Micromanipulator?

First and foremost, Brinkmann micromanipulators were designed for biological applications, so it’s no surprise they are widely used in microsurgery and neurophysiology. What is surprising is that they have so many other uses. For example, in microchemistry, they’re used to handle radioactive samples; in electronics, to probe microcircuits, and by physicists to align laser systems.

What could you be doing more efficiently with a Brinkmann micromanipulator? Over 40 different models permit precise movement in magnification ranges up to 750X. There are inverted models, models with calibrated high sensitivity devices, tilting and rotating devices, and a full range of accessories. Let our free catalog start you thinking of some novel new uses. Just write: Brinkmann Instruments, Contiague Rd., Westbury, New York 11590.

America’s first Astronics

The crew from Charles River. They’re ready to play a down-to-earth role in lunar research by helping evaluate reactions of earth life to moon material brought back by future Apollo modules. Charles River has supplied the Apollo program with nearly 2,000 Astronics of three different types. Germfree: without any microbiological flora. Associated: germfree animals introduced to known members of specific bacteria. And C085*: Caesarean-Originated, Barrier-Sustained. If your project calls for mice or rats of absolute quality and dependability, you’ll have them within hours. Just tell us where. And how many. Drop us a line for a price list or further information. Charles River Laboratories, Inc., Wilmington, Massachusetts, U.S.A. or Elbeuf, France.

DU PONT PLASTIC LIGHT GUIDE KIT

Experiment with amazing new plastic fiber optic light guide kit. Easy fails for you, experimenters, hobbyists. Use for exciting new projects and products. Guides transmit light same as wire conducts electricity. Useful for illuminating remote areas, multiple locations from single source. Combine light to small areas, conduct Aurora, and control systems. Suitable for radio, TV, product testing, X-ray work, color photography.

Stock No. 70,852W...$7.00 Ppd.

"TUF...MAKES MATH EASY"

Exciting new fun and action game of math logic challenges players from 6 to 96. Rules are simple. Combine and develop abilities of logic and reason while having lots of fun. Players determine how 2" TUF" will use to combine addition and subtraction to exponential powers and more. Recommended and endorsed by leading educators. Color ability levels-enables students to quickly move ahead to more advanced forms.

Stock No. 70,966W...$7.00 Ppd.

3" ASTRO. TELESCOPE

New 50X, 100X, 200X, phases of Venus, planets close up. to 180X. La Caille "Triumphant Mt. Palomar reflecting 200X, 150X, 100X, 50X, 10X, overwielded 2" diameter 1" per field. Equipped with 6X eyepiece and mounted 3X finder scope, hard-wood tripod, FREE! "STAR CHART": 24-page "HANDBOOK OF THE STARS". HOW TO USE YOUR TELESCOPE.

Stock No. 83,052W...$9.95 Ppd.

A New UV-Visible Spectrophotometer with Maximum Versatility
The SHIMADZU Multi-Convertible Double-40 Series

The Shimadzu Double-40 Series is a unique modular
spectrophotometric system built around a prism-grating
double monochromator which provides high resolution
(better than 2Å), low stray light (0.001% at 195 mpv), and
high photometric accuracy (better than 0.2%T in ex-
panded range). Other features: Undesired grating orders
are eliminated by prism-grating configuration; wavelength
readout is linear; the slit readout is in mÅ of spectral band-
width; automatic 0 and 100%T adjustment ensures no-drift
single beam operation.

Interchangeable detection modules are easily manipulated
on a rigid optical bench, offering optimum accuracy and
sensitivity for studies of either turbid samples or solutions.
Interchangeable sample compartments and monitoring sys-
tems (direct meter readout, digital readout device, and
recorder presentation) are also available. The system can
be made to function as a single beam or double beam
ratio recording spectrophotometer.

SeaKem® Brand
Agarose
Exclusive Distributor in the
laboratory and clinical fields—
BAUSCH & LOMB

Agarose is a highly soluble, strongly-gelling, non-ionic
Agar extract (powder form), with minimal absorption
and electroendosmosis. Useful in zone- and immuno-
electrophoresis, bacteriology and immunology where in-
creased sensitivity is desirable. A major application is
for use in the new Bausch & Lomb Spectrophor I...the
most advanced electrophoresis system.

SCIENCE, VOL. 160
new Sepharose®

Extends gel filtration separation and fractionation of high molecular weight substances: viruses, nucleic acids, proteins, polysaccharides

The new “bead form” of agarose—Sepharose—now extends the gel filtration method to the separation and fractionation of molecules with molecular weights in the millions. Sepharose is prepared in the “bead form” from agarose, the neutral portion of agar. By altering the concentration of agarose during preparation, Sepharose gels with different fractionation ranges are produced. Sepharose gels complement the present series of Sephadex® gels, and together they extend the limits of the gel filtration method for the fractionation of molecules with molecular weights ranging from essentially zero to approximately 25 million.

BRONWILL WARBURG APPARATUS

It was a swinger when first introduced. Even with 14 manometric stations the Bronwill UV still left plenty of working space in the lab. It was first to employ pre-calibrated and interchangeable glasswear... manometers and reaction flasks having their calibrated volumes etched permanently on the glass. From initial studies on “Old Yellow” to modern day research, Bronwill UV’s have played a vital role in biological science.

Today, the UV still swings... in six speeds and three amplitudes. Both popular Warburg Models UV and UVL employ a unique temperature regulation system: variowatt control and SCR circuitry, without mechanical contacts. Result is close control and superior bath uniformity... better than ±0.01°C.

Choose from two models: the standard UV, for routine gas exchange investigations and the UVL featuring built-in tungsten illumination for photosynthesis studies.

Your Bronwill Dealer can arrange a Demonstration. Or write Bronwill Scientific, Dept. S-4, 277 N. Goodman St., Rochester, N. Y. 14607
Value is a balance by Roller-Smith

The LG0500MG is the result of over 50 years’ experience in the precision balance field. And just one of 45 models made by Roller-Smith, ranging from 3 mg. to 50 grams. This complete line covers all applications, and includes a Universal Yarn Numbering Balance, a German Density Balance and the unique Rosano™ Surface Tensiometer. Prices? Remarkably reasonable. Send for our free 16-page illustrated catalog.

GASTRIC SECRETION – MECHANISMS AND CONTROL

Edited by T.K. Shnitka, J.A.L. Gilbert and R.C. Harrison, all University of Alberta, Canada

This volume of Proceedings of the Symposium held at the University of Alberta offers all readers interested in the secretory function of the stomach an opportunity to review the most recent advances in special areas of basic inquiry. Addressing an audience of 150 of the world’s foremost authorities in the field of gastric physiology, the following 31 invited speakers reported their research findings:

American Journal of Proctology has reviewed the book as follows:

"...All the papers are of very high quality, exceptionally well developed and illustrated, and highly authoritative. The text is recommended to those interested in research on the gastrointestinal tract."

516 pp.; 181 line and 64 halftone illus. $21.50

Four new top-loading balances described in Mettler bulletin

P160, P2000, P5, and P6 are Mettler's new top-loading balances. All provide improved precision/capacity relationships, and all feature analog or digital reading.

The P160 features a reversible scale which eliminates computations in weight-loss studies and permits easy gravimetric titrations.

Level-matic, a Mettler feature which automatically compensates for slight shifts in balance level, is supplied in the P5 and is an option in the P160 and P2000.

The P5 and P6 offer special advantages for weighings in the range of 5 to 6 kilograms; the P2000 is unusually compact.

Three Sherer Model CER 810 Controlled Environment Rooms used in the Animal Science Dept. of a leading Mid-Western University.

Sherer environmental rooms

When all things are considered; price, quality, performance, ease of installation, accuracy, service, and manufacturer's reputation, the best choice is SHERER Environmental Rooms. Write for complete information, a post-card will do.
Shandon gets to the bottom of your chromatography tank problems

The bottom of a Shandon Model 500 Panglas Chromatank is different because it's absolutely flat. Press molding eliminates the mold found at the bottom of ordinary tanks, giving you an even distribution of solvent throughout the tank and saving solvent, especially in ascending techniques.

Press molding also gives the Panglas Chromatank stronger corners and heavier walls. It's made entirely of glass, without metal or plastic fittings, to eliminate solvent contamination.

The Model 500 is the largest tank of its kind, measuring 20" x 8" x 22" high, accommodating either sheets or strips for ascending or descending chromatography. It will also accept 46 cm by 57 cm sheets making it ideal for two-way chromatography.

These three electrodes have been added to Orion’s superb line, making fifteen all told—all stocked by us. Details will be sent on request.

**ORION COMBINATION CHLORIDE ELECTRODE:** At last—an electrode so compact, it can determine the chloride content in samples as small as a single drop! When used with Orion Specific Ion Meter 401 or 404, you have a completely portable system for rugged field determinations of chloride. Thousands of children have been screened for cystic fibrosis . . . detected by an abnormally high chloride level in the patient’s sweat. *Cat. No. H-5745X. Price $180.00.*

**ORION DOUBLE-JUNCTION ELECTRODE:** This electrode is as technologically advanced as a specific ion electrode. It can be used for any specific ion or pH electrode measurement. Won’t contaminate sample! Inner and outer chambers are easily refilled. Readily disassembled for cleaning. Unique construction allows instant reading of filling solution levels. Unprecedented drift-free readings. *Cat. No. H-5718X. Price $48.00.*

**ORION SINGLE-JUNCTION REFERENCE ELECTRODE:** Offers fast equilibration with changes in temperature. Designed to be interchangeable with glass reference electrodes. Ideal for use with slurries, suspensions and viscous samples . . . because it’s so easy to disassemble and clean. Doubles as a general-reference pH electrode. *No. H-5490X. Price $32.00.*

**SINGLE-JUNCTION REFERENCE**
