The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

COVER
Painted wood kachina doll made in the 19th century by a Hopi Indian of the southwestern United States. Such dolls are carved and decorated to represent supernatural beings. See review of American Indian Painting of the Southwest and Plains Area, page 35. [The Brooklyn Museum, Brooklyn, New York]
