
Reactions of Aromatic and Sulfur Amino Acids in Ribonuclease with Hydrogen Atoms in Water Solution: *R. Shapiro and G. Stein* .................................................. 1489

Staphylococcal Nuclease: Size and Specificity of the Active Site: *P. Cuatrecasas, M. Wilchek, C. B. Anfinsen* ................................................................. 1491

Warfarin Treatment of Mice Bearing Autochthonous Tumors: Effect on Spontaneous Metastases: *J. J. Ryan, A. S. Ketcham, H. Wexler* .................................. 1493

Immunologic Enhancement of Tumor Xenografts by Pepsin-Degraded Immunoglobulin: *S. Broder and F. Whitehouse, Jr.* ..................................................... 1494

Biologic Precipitation of Fluorite: *H. A. Lowenstam and D. McConnell* ................................................................. 1496

Amino Acid Composition of Organic Matrix in Calcareous Oolites: *R. M. Mitterer* ................................................................. 1498

Receptors Sensitive to Carbon Dioxide in Lungs of Chicken: *D. F. Peterson and M. R. Fedde* ................................................................. 1499

Separation of Cellular from Extracellular Controls of Drinking in Rats by Frontal Brain Damage: *E. M. Blass* ................................................................. 1501

Sleep after Exercise: *J. A. Hobson* ................................................................. 1503

Is Orientation-Specific Color Adaptation in Human Vision Due to Edge Detectors, Afterimages, or “Dipoles”?: *C. S. Harris and A. R. Gibson* .................................. 1506

**MEETINGS** Peptides: *B. Weinstein and S. Lande; Calendar of Events* .................. 1511

---

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1978. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
