Assembly of Protein and Nucleoprotein Particles from Extracted Tobacco Rattle Virus Protein and RNA: J. S. Semancik and D. A. Reynolds

Aminoacyl Transfer Ribonucleic Acid Synthetases from Cell-Free Extract of Plasmodium berghei: J. I.an and J. Iian

Circadian Rhythm of Optic Nerve Impulses Recorded in Darkness from Isolated Eye of Aplysia: J. W. Jacklet

Interaction of Plant Hormones: R. E. Drury

Fissioning in Planarians: Control by the Brain: J. B. Best, A. B. Goodman, A. Pignon

Glucagon-Sensitive Adenylyl Cyclase in Plasma Membrane of Hepatic Parenchymal Cells: S. L. Pohl, L. Birnbaumer, M. Rodbell

Cytogenetic Effects of Cyclamates on Human Cells in vitro: D. Stone et al.

Glycine in the Spinal Cord of Cats with Local Tetanus Rigidity: T. Sembra and M. Kano

Translocation in Perennial Monocotyledons: W. Heyser, W. Eschrich, R. F. Evert

Lysergic Acid Diethylamide: Effects on the Developing Mouse Lens: J. K. Hanaway

DDT Residues Absorbed from Organic Detritus by Fiddler Crabs: W. E. Odum, G. M. Woodwell, C. F. Wurster

Encephalitogenic Protein: Structure: R. F. Kibler et al.

Preferential Synthesis of Ferritin and Albumin by Different Populations of Liver Polysomes: S. J. Hicks, J. W. Drysdale, H. N. Munro

Alcohol Dehydrogenase in Maize: Genetic Bases for Multiple Isozymes: D. Schwartz

Auditory Sequence: Confusion of Patterns Other Than Speech or Music: R. M. Warren et al.

MEETINGS

Coastal Engineering: M. M. Nichols

COVER

Waterspouts off the Bahamas provide a striking example of the interaction between sea and air. The Barbados Oceanographic and Meteorological Experiment (BOMEX), which began 1 May and will continue through July, will focus on air-sea interaction phenomena and is one of the most ambitious weather experiments ever undertaken (see Science, 28 March, page 1435). [Stephen Gwin, Island Heights, New Jersey]
