Azurin: X-ray Data for Crystals from Pseudomonas denitrificans: G. Strahs .......................... 60
Biochemistry at 100°C: Explosive Secretory Discharge of Bombardier Beetles (Brachinus): D. J. Aneshansley et al. ........................................................... 61
Adenosine 3',5'-Monophosphate-Dependent Protein Kinase from Brain: E. Miyamoto, J. F. Kuo, P. Greengard .............................. 63
Tadpole Antibodies against Frog Hemoglobin and Their Effect on Development: G. M. Maniatis, L. A. Steiner, V. M. Ingram ................... 67
Uncus and Amygdala Lesions: Effects on Social Behavior in the Free-Ranging Rhesus Monkey: D. Dicks, R. E. Myers, A. Kling .................. 69
Origin of Repopulating Cells after Localized Bone Marrow Depletion: M. A. Maloney and H. M. Patt ................................................................. 71
Protein Content of Seed: Increase Improves Growth and Yield: C. J. Schweitzer and S. K. Ries ................................................................. 73
Actinomycin Binding to DNA: Inability of a DNA Containing Guanine To Bind Actinomycin D: R. D. Wells ...................................................... 75
Ion Exchange in Escherichia coli: Potassium-Binding Proteins: R. Damadian .............................................. 79
Blood-Brain Barrier: Evidence for Active Cation Transport between Blood and the Extracellular Fluid of Brain: L. Z. Bito ........................................... 81
Forebrain Temperature Activates Behavioral Thermoregulatory Response in Arctic Sculpins: H. T. Hammel, S. B. Strömme, K. Myhre ......................... 83
Ribosomal Protein Conferring Sensitivity to the Antibiotic Spectinomycin in Escherichia coli: A. Bolien et al. .................................................. 85
Optics of Arthropod Compound Eye: S. R. Shaw .................................................. 88

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
