Elimination of Sodium-24 and Potassium-42 Interferences in Activation Analysis of Biological Samples: C.-W. Tang and C. J. Maldetskos

Maxillary Mycangium in the Mountain Pine Beetle: H. S. Whitney and S. H. Farris

Potassium Ions Asymmetrically Activate Erythrocyte Membrane Phosphatase: A. F. Rega, M. I. Pouchon, P. J. Garrahan

Kasugamycin Resistance: 30S Ribosomal Mutation with an Unusual Location on the Escherichia coli Chromosome: P. F. Sparling

Regenerative Calcium Release within Muscle Cells: L. E. Ford and R. J. Podolsky

Simian Virus 40 in Polio Vaccine: Follow-Up of Newborn Recipients: J. F. Fraumeni, Jr., et al.

Cockroach Leg Regeneration: Effects of Ecdysterone in vitro: E. P. Marks and R. A. Leopold

Lactate Dehydrogenase Isozymes: Kinetic Properties at High Enzyme Concentrations: T. Wintch, R. F. Chen, E. S. Vesell

Membrane Potential as a Signal of Ion and Metabolic Components: M. F. Marmor and A. L. F. Gorman

Duplicate Plating of Immune Cell Products: Analysis of Globalin Class Secretion by Single Cells: B. Merchant and Z. Brahmi

Metastasizing Mammary Carcinomas in Rats: Induction and Study of Their Immunogenicity: U. Kim

Ligand-Induced Maturation of Threonine Deaminase: G. W. Hatfield and R. O. Burns

Receptor Potentials from Hair Cells of the Lateral Line: G. G. Harris, L. S. Frishkopf, A. Flock

Glycerol Ether Metabolism: Regulation of Buoyancy in Dogfish Squatess acutauses: D. C. Malins and A. Barone

Animal Cells: Noncorrelation of Length of G1 Phase with Size after Mitosis: T. O. Fox and A. B. Pardee

Sex Control by Bees: A Voluntary Act of Egg Fertilization during Oviposition: H. S. Gerber and E. C. Klostermeyer

Opponent Color Cells in the Cat Lateral Geniculate Nucleus: A. L. Pearlman and A. W. Daw

Proposed U.S. supersonic transport (SST, Boeing 2707-300). Research in stratospheric meteorology has provided important information for future operational support of this and other supersonic transports. See page 16. [Gary Lurish Photography, Washington, D.C.; model courtesy of Boeing Co.]
