Potassium Ion Specific Electrode with High Selectivity for Potassium over Sodium:  
M. S. Frant and J. W. Ross, Jr. .......................... 987

Placental Transfer of a Substituted Piperidine from Fetus to Mother:  
J. L. McNay and P. G. Dayton .......................... 988

Environmental and Genetical Contributions to Class Difference: A Model Experiment:  
J. M. Thoday and J. B. Gibson .......................... 990

Bladder Cancer Induction by Aromatic Amines: Role of N-Hydroxy Metabolites:  
J. L. Radomski and E. Brill .......................... 992

Beta Glucuronidase Activity in Skin Components of Children with Cystic Fibrosis:  
G. E. Gibbs and G. D. Griffin .......................... 993

Horseshoe Crab Lactate Dehydrogenase: Tissue Distribution and Molecular Weight:  
E. J. Massaro .................................................. 994

Production of Mouse Urinary Bladder Carcinomas by Sodium Cyclamate: G. T. Bryan  
and E. Erulk .................................................. 996

Proinsulin: Metabolic Effects in the Human Forearm: S. E. Fineberg and  
T. J. Merimee .................................................. 998

Somatic Association in Avena sativa L.: J. P. Dubuc and R. C. McGinnis .......................... 999

Cerebral Hemorrhage in Relation to Birth Asphyxia: W. F. Windle .......................... 1000

Neutrophils: Their Role in the Formation of a Tick Feeding Lesion: R. J. Tatchell  
and D. E. Moorhouse ........................................ 1002

Alanine: Key Role in Gluconeogenesis: P. Felig et al. ........................................ 1003

Alcohol, Amines, and Alkaloids: A Possible Biochemical Basis for Alcohol Addiction:  
V. E. Davis and M. J. Walsh .................................. 1005

Cretinism in Rats: Enduring Behavioral Deficit Induced by Tricyanoaminopropene:  
J. W. Davenport .................................................. 1007

Directional Hearing: Effect of Unilateral Change of the Sound Duration:  
N. Y. Alexeenko .................................................. 1009

Unilateral Inhibition of Sound-Induced Convulsions in Mice: R. L. Collins .......................... 1010

Technical Comments: Earthquakes and Nuclear Detonations: D. L. Anderson et al.;  
J. H. Allen and L. F. Bailey; A. Ryall and G. Boucher; C. Emiliani,  
C. G. A. Harrison, M. Swanson; Bentonite Landslides: D. B. Prior and C. Ho;  
D. M. Anderson, J. Brown, R. C. Reynolds; α-Antitrypsin Deficiency:  
J. Lieberman; F. Kueppers; Monosodium Glutamate: Specific Brain Lesion  
Questioned: C. U. Lowe; M. R. Zavon; J. W. Olney and L. G. Sharpe .................................. 1011

Enzyme Regulation in Mammalian Tissues: G. Weber; Courses .................................. 1018

Composite of uranium oxide and tungsten. The bright tungsten fibers  
are exposed because a thin layer of the oxide matrix was selectively etched  
away. The sample was not coated with a conductive layer and the emissive  
mode was used at a viewing angle of 0 degree. The composite was  
unidirectionally solidified in a modified floating zone process (X about  
2300). See page 979. [R. J. Gerdes and A. T. Chapman, Georgia Institute of Technology; G. W. Clark,  
Oak Ridge National Laboratory]
