Viscosity of Lunar Lavas: T. Murase and A. R. McInerney ........................................... 1491
Supersaturation of Gases in Water: Absence of Cavitation on Decompression from High Pressures: E. A. Hemmingsen .................................................. 1493
Uranium Localization on Hydroxypatite by Analysis of Fission Fragment Tracks: R. C. Thompson ............................................................... 1494
Fluid Transport: Concentration of the Intercellular Compartment: B. J. Wall, J. L. Oschman, B. Schmidt-Nielsen ........................................ 1497
Postnatal Muscle Fiber Assembly: Localization of Newly Synthesized Myofibrillar Proteins: E. Morkin ................................................................. 1499
Cytogetic Studies with Cyclamate and Related Compounds: D. R. Stoltz et al. .................. 1501
Unified Account of the Variable Effects of Carbon Dioxide on Nerve Cells: J. L. Walker, Jr., and A. M. Brown .............................................. 1502
Line and Grade in the Extinct Medius Species Group of Signodon: R. A. Martin .............. 1504
Carbon Dioxide Fixation by Mouse Embryos prior to Implantation: C. N. Graves and J. D. Biggers ................................................................. 1506
Hyperbaric Oxygen: Effects on Metabolism and Ionic Movement in Cerebral Cortex Slices: P. Joanny, J. Corriol, F. Brue ........................................ 1508
Glycine Inhibition of Asparaginase: W. L. Ryan and H. C. Sornson ............................... 1512
Heterozygous Beta Thalassemia: Balanced Globin Synthesis in Bone Marrow Cells: E. Schwarz ................................................................. 1513
Bone Marrow and Spleen: Dissociation of Immunologic Properties by Cortisone: M. A. Levine and H. N. Chram .......................................... 1515
Human Auditory Evoked Potentials: Possible Brain Stem Components Detected on the Scalp: D. L. Jewett, M. N. Romano, J. S. Williston ................. 1517

MEETINGS
Physical and Chemical Aspects of Ionization and Excitation Processes: F. Williams; Gene Regulation in Mammalian Cells: S. Gluecksohn-Waelsch; Calorimetry: G. C. Sinke ................................................................. 1522

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

Growth surface of the nacreous layer in Pinna corta radiata (pelecypod). New crystals form at the margins of the overlapping mineral laminae (about x 2900). See page 1486. Sherwood W. Wise, Jr., University of Illinois
