The new Mini-Pherograph lets you do refrigerated, high-voltage electrophoretic separations on a table-top.

Compactness is but one advantage of the new Brinkmann Mini-Pherograph. Here are some others: high and low voltage systems (3000V/500V) in the same instrument; built-in refrigeration with temperature control to 0°C (uniformity to ± 0.25°C), eliminating the need for external liquid accessories; no diffusion problems due to "free water"; 350 x 400 mm developing chamber; platinum ribbon electrodes. All this adds up to an instrument producing separations whose quality is hard to equal.

To find out more about the new Mini-Pherograph and full-size Pherographs, get our free catalog. Just write: Brinkmann Instruments, Cantague Road, Westbury, N.Y. 11590. In Canada, write: Brinkmann Instruments (Canada) Ltd., 50 Galaxy Boulevard, Rexdale (Toronto), Ontario.
