
Woody Plants: Changes in Survival in Response to Long-Term (8 Years) Chronic Gamma Irradiation: A. H. Sparrow et al. ......................................................... 1082

Crystal and Molecular Structure of a Thymine Phototrimeter: J. L. Flippen, I. L. Karle, S. Y. Wang ................................................................. 1084

Deuterium: Natural Variations Used as a Biological Tracer: J. D. Gleason and I. Friedman ................................................................. 1085

Transmissible Mink Encephalopathy: Experimental Transmission to the Squirrel Monkey: R. J. Eckroade et al. ......................................................... 1088

Mutation in Internode Length Affects Wheat Plant-Type: C. O. Qualset et al. ......................................................... 1090

Myeloperoxidase: Contribution to the Microbicidal Activity of Intact Leukocytes: S. J. Klebanoff ......................................................... 1095

Cyclic Cytidine 2',3'Phosphate: Molecular Structure: C. L. Coulter and M. L. Greaves ......................................................... 1097

Conversion of Thyroxine to Triiodothyronine in Normal Human Subjects: K. Sterling, M. A. Brenner, E. S. Newman ......................................................... 1099

Serotonin-Containing Neurons in Brain: Depression of Firing by Monoamine Oxidase Inhibitors: G. K. Aghajanian, A. W. Graham, M. H. Sheard ......................................................... 1100

Technical Comments: Alcohol Addiction and Tetrahydropapaveroline: P. V. Halushka and P. C. Hoffmann; V. E. Davis and M. J. Walsh ......................................................... 1104

ASSOCIATION AFFAIRS
Aleutian Ecosystem: W. S. Laughlin ......................................................... 1107

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

COVER
Storm waves break with great force upon a sea wall along the coast of Great Britain. [Environmental Science Services Administration; from Exploring the Ocean World, Thomas Y. Cromwell Co., New York City, 1969]
