COVER

Cloud on 19 May 1968 that is growing explosively 13 minutes after having been seeded with silver iodide pyrotechnics. Height of the cloud top is 11.5 kilometers enroute to a maximum height of approximately 12.5 kilometers. Picture was taken from a DC-6 aircraft flying at 6.1 kilometers over southern Florida. See page 127. [Environmental Science Services Administration Research Laboratories, Coral Gables, Florida]

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
