Alpha-Recoil Thorium-234: Dissolution into Water and the Uranium-234/Uranium-238 Disequilibrium in Nature: K. Kigoshi
Phenylmercuric Acetate: Metabolic Conversion by Microorganisms: F. Matsumura, Y. Gotoh, G. M. Boush
1,25-Dihydroxycholecalciferol: Identification of the Proposed Active Form of Vitamin D₃ in the Intestine: A. W. Norman et al.
Fertilization of Rabbit Ova in vitro by Sperm with Adsorbed Sendai Virus: R. J. Ericsson, D. A. Buthala, J. F. Norland
Primary Structure of the Human Chorionic Somatomammotropin (HCS) Molecule: C. H. Li, J. S. Dixon, D. Chung
Motion-Induced Inhibition of Elongation and Induction of Dormancy in Liquidambar: P. L. Neel and R. W. Harris
Teratogenic Effects of a Chelating Agent and Their Prevention by Zinc: H. Swenerton and L. S. Hurley
Angiotensin-Forming Enzyme in Brain Tissue: D. Ganen et al.
Hypolipidemia in a Mutant Strain of "Acatalasemic" Mice: S. Goldfischer et al.
Southern Corn Leaf Blight: Susceptible and Resistant Mitochondria: R. J. Miller and D. E. Koepp
Superior Colliculus: Some Receptive Field Properties of Bimodally Responsive Cells: B. G. Wickelgren
Delta-9-Tetrahydrocannabinol: Metabolism and Disposition in Long-Term Marihuana Smokers: L. Lemberger et al.
How Does the Striate Cortex Begin the Reconstruction of the Visual World?: D. A. Pollen, J. R. Lee, J. H. Taylor
Somatosensory Responses of Bulboreticular Units in Awake Cat: Relation to Escape-Producing Stimuli: K. L. Casey
Caudate Nucleus Stimulation Retroactively Impairs Complex Maze Learning in the Rat: H. V. S. Peekte and M. J. Herz
Technical Comments: Allergic and Classically Conditioned Asthma in Guinea Pigs: A. Bouhuys; D. R. Justesen

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

Cover
Holographic interferogram revealing dangerous bonding defect located deep inside an automobile tire. By combining lasers and holography, the non-destructive method of "holographic interferometry" has introduced a new form of interferometry into optics, capable of revealing microscopic deformations on large-size objects. See page 11. [GC-OPTRONICS, Ann Arbor, Michigan]
Science 173 (3991), 6-82.
