COVER

Electron micrograph of 2H-phase of tantalum disulfide. A high degree of order is evident. The period is 6 angstroms. (about × 2.5 × 10^6) See page 493. [H. Fernández-Morán, University of Chicago]

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
Science 174 (4008), 454-C-527.
