The American Association for the Advancement of Science was founded in 1849 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

COVER
Interspecific, threatening posture in cheetah (Acinonyx jubatus). See page 615. [Randy Eaton, University of Georgia, Athens]
