LETTERS

Trustees of Civilization: A. Polonio; M. D. Cannon; P. J. Stamler; K. Sax; G. Audesirk; G. Hardin; fd Virus Photo: G. W. Stroke; Research on Narcotic Antagonists: L. Bergner; Two Kinds of Perpetual Motion: D. L. Wilson

EDITORIAL

The Role of Scientific Instrumentation

ARTICLES

Interstellar Molecules and Dense Clouds: D. M. Rank, C. H. Townes, W. J. Welch

NEWS AND COMMENT

DDT: In Field and Courtroom, a Persistent Pesticide Lives on
Community Mental Health Centers: Growing Movement Seeks Identity
The Great Race: Virus Find Awakens Hope for Sufferers
Mobile TB X-ray Units: An Obsolete Technology Lingers

BOOK REVIEWS

Changes and Continuity in Infancy, reviewed by W. Emmerich; other reviews by W. L. Godwin, G. R. Willey, D. J. Warner, J. W. Hedgpath, D. Epel, L. J. Battan; Books Received

REPORTS

Acceleration of Nitrogen Ions to 7.4 Gev in the Princeton Particle Accelerator: M. G. White et al.

Prediction of the Spatial Distribution of Cell Survival in Heavy Ion Beams: K. G. Vosburgh ............................................ 1125
Spatial Distribution of Biological Effect in a 3.9-Gev Nitrogen Ion Beam: P. Todd et al. .................................................. 1127
Acceleration of Heavy Ions at the Bevatron: H. A. Grunder, W. D. Hartsough, E. J. Lofgren .................................................. 1128
Fragmentation of Nitrogen-14 Nuclei at 2.1 Gev per Nucleon: H. H. Heckman et al. ................................................................. 1130
Radiological Physics Characteristics of the Extracted Heavy Ion Beams of the Bevatron: C. A. Tobias et al. ........................................... 1131
Human Leukemic Cells: In vitro Growth of Colonies Containing the Philadelphia (Ph1) Chromosome: P. A. Chervenick et al. ............... 1134
Detection of an Antigen Associated with Acute Leukemia: D. L. Mann et al. ................................................................. 1136
Autoimmune Murine Thyroiditis Relation to Histocompatibility (H-2) Type: A. O. Vladutiu and N. R. Rose ........................................... 1137
Genetic Control of an Insect Neuronal Network: D. R. Bentley ................................................................. 1139
Raman Spectrum of a Transfer RNA: M. Tsuboi et al. ................................................................. 1142
Leech-Repellent Property of Eastern Red-Spotted Newts, Notophthalmus viridescens: F. H. Pough .................................................. 1144
Visual and Auditory Inputs into the Cuneate Nucleus: S. J. Jabbur et al. ................................................................. 1146
Technical Comments: Comparative Ability of Hycanthone and Miracil D to Interact with DNA: E. Hirschberg and I. B. Weinstein; Height, Weight and Age at Menarche and the “Critical Weight” Hypothesis: F. E. Johnston, R. M. Malina, M. A. Galbraith; R. E. Frisch, R. Revele, S. Cook .................................................. 1147
MEETINGS The 21st Pugwash Conference on Science and World Affairs: B. T. Feld; Regulation of Mammalian Reproduction: R. Crozier .................................................. 1150

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
