EDITORIAL
NSF: A Look Ahead: W. D. McElroy

ARTICLES
The Apollo 15 Lunar Samples: A Preliminary Description: Apollo 15 Preliminary Examination Team
Gene Conferring Specific Plant Disease Resistance: K. W. Shepherd and G. M. E. Mayo
Weight-Watching at the University: The Consequences of Growth: J. A. Gallant and J. W. Prothero

NEWS AND COMMENT
'73 Budget: Administration Bets on Applied Science
NSF: A Boost for Relevance
Space Shuttle: Compromise Version Still Faces Opposition
Environmental Action Organizations Are Suffering from Money Shortages, Slump in Public Commitment

RESEARCH TOPICS
X-ray Astronomy: Observations of New Phenomena

BOOK REVIEWS
California Water and The Water Hustlers, reviewed by H. E. Thomas; The Genetics of Mental Disorders, S. Kessler; Army Ants, C. W. Rettenmeyer; Cyclic AMP, P. Greengard; 6-Hydroxydopamine and Catecholamine Neurons, L. S. Van Orden III; Chemotherapy and Drug Resistance in Malaria, R. D. Powell; Membranes and Ion Transport, A. R. Freeman; Probability Models and Statistical Methods in Genetics, J. H. Gillespie; Principles of Chemical Sedimentology, D. D. Runnells; Books Received
Geologic Setting of the Apollo 15 Samples: Apollo Lunar Geology Investigation Team ................................................. 407
Chemistry, Geochronology, and Petrogenesis of Lunar Sample 15555: B. W. Chappell et al. ........................................ 415
Argon-40-Argon-39 Dating of Apollo Sample 15555: E. C. Alexander, Jr., P. K. Davis, R. S. Lewis .......................... 417
Rubidium-Strontium and Potassium-Argon Age of Lunar Sample 15555: V. Rama Murthy et al. ................................. 419
Rare Gas Record in the Largest Apollo 15 Rock: K. Marti and B. D. Lightner ...................................................... 421
Geochemistry of Apollo 15 Basalt 15555 and Soil 15531: C. C. Schnetzler et al. ...................................................... 426
Age of a Lunar Anorthosite: L. Hussain, O. A. Schaefer, J. F. Sutter ................................................................. 428
Lunar Anorthosite 15415: Texture, Mineralogy, and Metamorphic History: O. B. James .................................................. 432
Apollo 15 Geochemical X-ray Fluorescence Experiment: Preliminary Report: I. Adler et al. ........................................ 436
Primordial Radioelements and Cosmogenic Radionuclides in Lunar Samples from Apollo 15: G. D. O’Kelley et al. .............. 440
Mars: An Evolving Atmosphere: M. B. McElroy ......................................................... 443
Bone Marrow: The Bursa Equivalent in Man?: N. I. Abdou and N. L. Abdou ...................................................... 446
L-Leucine: A Neuroactive Substance in Insects: S. Tashiro, E. Taniguchi, M. Eto .................................................. 448
Ethnic Differences in Alcohol Sensitivity: P. H. Wolff ......................................................... 449
Operant Behavior Changes Norepinephrine Metabolism in Rat Brain: A. J. Lewy and L. S. Selden ........................................ 454
Variations of the Visual Responses of the Superior Colliculus in Relation to Body Roll: S. Bisti, L. Maffei, M. Piccolino 456

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
Science 175 (4020), 356-458.
