DIVISIONS

SCIENCE is published weekly, except the last week in December, with an extra issue on the third Tuesday in November, by the American Association for the Advancement of Science, 1515 Massachusetts Ave., NW, Washington, D.C. 20005. The annual subscription price is $20; foreign postage: Americas $3; overseas $5; air freight to Europe, North Africa, Near East $1 single copies $1 (back issues, $2) except Guide to Scientific Instruments which is $4. School year subscription: 9 months, $15; 10 months, $16.75. Provide 4 weeks notice of change of address, giving new and old address and zip code. Send a recent address label. SCIENCE is indexed in the Reader's Guide to Periodical Literature.
Pressure Blades and Total Cutting Edge: An Experiment in Lithic Technology: P. D. Sheets and G. R. Muto .................................................. 632
Spiral Waves of Chemical Activity: A. T. Winfree .................................................. 634
Giant Amphipod from the Abyssal Pacific Ocean: R. R. Hessler, J. D. Isaacs, E. L. Mills .................................................. 636
Ovulation in Hamster: Induction by β Subunit of Ovine Interstitial Cell Stimulating Hormone: W. H. Yang et al. .................................................. 637
Ecosystem Alteration by Mosquitofish (Gambusia affinis) Predation: S. H. Huribert, J. Zedler, D. Fairbanks .................................................. 639
Cytochalasin B: Effects on Microfilaments and Movement of Melanin Granules within Melanocytes: J. McGuire and G. Moellmann .................................................. 642
Tetraploid Origin of the Karyotype of Catostomid Fishes: T. Uyeno and G. R. Smith .................................................. 644
A Fluorescent Modification of Adenosine Triphosphate with Activity in Enzyme Systems: 1, N2-Ethenadenosine Triphosphate: J. A. Secrist III, J. R. Barrio, N. J. Leonard .................................................. 646
Crayfish Muscle Receptor Organ: Role in Regulation of Postural Flexion: C. H. Page and P. G. Sokolove .................................................. 647
Externally Suppressible Proline Quadruplet CCGC; J. Yurino and T. Kohno .................................................. 650
Membrane Continuity between Plasmalemma and Nuclear Envelope in Spermatogenic Cells of Blasia: Z. B. Carothers .................................................. 652
Growth Retardation in Offspring of Female Rats Treated with Morphine Prior to Conception: G. Friedler and J. Cochlin .................................................. 654
Inhibition of the Renin-Angiotensinogen Reaction by Pepstatin: F. Gross, J. Lazar, H. Orth .................................................. 656
Seminal Vesicle Formation and Specific Male Protein Secretion by Female Cells in Allophonic Mice: B. Mintz et al. .................................................. 657
Parasympathetic Ganglia: Activation of an Adrenergic Inhibitory Mechanism by Cholinomimetic Agents: W. R. Saum and W. C. de Groat .................................................. 659
Neuronal Correlates of Eye Movements in the Visual Cortex of the Cat: H. Noda, R. B. Freeman, Jr., O. D. Creutzfeldt .................................................. 661
Magnetencephalography: Detection of the Brain's Electrical Activity with a Superconducting Magnetometer: D. Cohen .................................................. 664
Technical Comment: Behavior of B-Chromosomes in Xanthisma texanum DC.: A Nonrandom Phenomenon: J. C. Semple .................................................. 666

Water Importation: AAAS Committee on Arid Lands .................................................. 667

COVER

Involute spiral waves propagating after disruption of spontaneously formed circular waves in a layer (1 millimeter in depth) of Zhabotinsky-Zaikin reagent. Small circles are carbon dioxide bubbles. Rotation period is 60 seconds; propagation velocity is 3.3 millimeters per minute at 6°C (actual size of dish, 9 centimeters in diameter). See page 634. [Ken Harvey, Photographic Section, MRC Laboratory of Molecular Biology, Cambridge, England]
