Limits to Growth

ARTICLES
Gosses Bluff Impact Structure, Australia: D. J. Milton et al.
Classic to Postclassic in Highland Central Mexico: D. E. Dumond and F. Muller
Costs, Benefits, Effectiveness: Challenge to Educational Technology: L. P. Grayson

NEWS AND COMMENT
Academic Freedom at Stanford: Lessons of the Franklin Case
Division of Biologics Standards: The Boat That Never Rocked

RESEARCH NEWS
Cancer Radiation Therapy: Potential for High Energy Physics

BOOK REVIEWS
Avian Biology, reviewed by A. Keast; Geography of Domestication, R. I. Ford; Mountain Sheep, R. M. F. S. Sadler; Numerical Weather Prediction, Y. Kurihara; Bioinorganic Chemistry, A. Hooper; Aspects of Terpenoid Chemistry and Biochemistry and Terpenoids and Steroids, R. A. Bernhard; Changing Syntheses in Development, P. J. Stambrook; Neurotransmitter-Receptor Interactions, D. H. Jenkinson and L. T. Potter; Vertebrate Paleozoology, L. Van Valen; Books Received

REPORTS
Archeological Excavations in Jalisco, Mexico: B. Bell
Electrical Generation of Natural Aerosols from Vegetation: B. R. Fish
Apollo 14 Active Seismic Experiment: J. S. Watkins and R. L. Kovach

An Eocene Hystriognathous Rodent from Texas: Its Significance in Interpretations of Continental Drift: A. E. Wood ........................................... 1250

Nerve Growth Factor: Stimulation of Regenerative Growth of Central Noradrenergic Neurons: A Björklund and U. Stenevi ........................................... 1251

The Hill Plot and the Energy of Interaction in Hemoglobin: H. A. Saroff and A. P. Minton ........................................... 1253

Rabies Virus in Nasal Mucosa of Naturally Infected Bats: D. G. Constantine, R. W. Emmons, J. D. Woodie ........................................... 1255

Paraoxon: Effects on Rat Brain Cholinesterase and on Growth Hormone and Prolactin of Pituitary: G. Cehovic, W-D. Dettbarn, F. Welsch ........................................... 1256

Predation of Schistosomiasis Vector Snails by Ostracoda (Crustacea): I. G. Sohn and L. S. Kornicker ........................................... 1258

Homology between Nucleic Acids of Blue-Green Algae and Chloroplasts of Euglena gracilis: G. H. Pigott and N. G. Carr ........................................... 1259

Activities of Sodium and Potassium Ions in Epithelial Cells of Small Intestine: C. O. Lee and W. McD. Armstrong ........................................... 1261

Messenger RNA Structure: Compatibility of Hairpin Loops with Protein Sequence: H. B. White III, B. E. Laux, D. Dennis ........................................... 1264

Iodine Metabolism: Preferential Renal Excretion of Iodide Derived from Triiodothyronine Deiodination: S. Shimoda and M. A. Greer ........................................... 1266

Fluorescent Banding Patterns of Rat Chromosomes in Normal Cells and Primary Hepatocellular Carcinomas: S. R. Wolman, T. F. Phillips, F. F. Becker ........................................... 1267

6,7-Dihydroxytetrahydroisouquinoline: Uptake and Storage by Peripheral Sympathetic Nerve of the Rat: G. Cohen, C. Mytilineau, R. E. Barrett ........................................... 1269

Coexistence of Two Asexual Strains on a Single Resource: B. R. Levin ........................................... 1272

Electron Microscopic Evidence for Plasmodesmata in Dicotyletonous Guard Cells: J. E. Pallas, J., and H. H. Mollenhauer ........................................... 1275

White-Noise Analysis of a Neuron Chain: An Application of the Wiener Theory: P. Z. Marmarelis and K. Naka ........................................... 1276

MEETINGS

Prostaglandins in Fertility Control: S. Bergström et al.; Forthcoming Events ........................................... 1280

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

Cover

Flat, molded figurines with forward-jutting feet and prominent teeth (often stylishly mutilated) were made around A.D. 900 in highland central Mexico. This figurine was excavated in 1969 at the Cerro de Xochitecatl, Tlaxcala, by Bodo Spranz, under the auspices of the Deutsche Forschungsgemeinschaft (actual size, about 20 centimeters high). See page 1208. [Don E. Dumond, University of Oregon, Eugene]
Science 175 (4027), 1192-1287.
