Amino Acid Composition of Planktonic Foraminifera: A Paleobiochemical Approach to Evolution: K. King, Jr., and P. E. Hare .......................... 1461
Chemical Methods for Removing Radon and Radon Daughters from Air:
L. Stein .................................................. 1463
High-Temperature Superconductors, the First Ternary System:
B. T. Matthias et al. ...................................... 1465
Genetic Variation in Human Erythrocyte Acetylcholinesterase: P. M. Coates and N. E. Simpson .................................................. 1466
Expression of the Mammalian X Chromosome before and after Fertilization:
C. J. Epstein ............................................. 1467
Sex Pheromones of Summer Fruit Tortrix Moth Adoxophyes orana: Two Synergistic Isomers: G. M. Meijer et al. ..................................... 1469
Cortical Afferents to the Entorhinal Cortex of the Rhesus Monkey:
G. W. Van Hoesen, D. N. Pandya, N. Buters .................................. 1471
Transfer Factor from Guinea Pigs Sensitive to Dinitrochlorobenzene: Absence of Superantigen Properties: D. R. Burger, R. M. Vetto, A. Malley ................. 1473
Active Transport of Potassium and Chloride in an Identifiable Molluscan Neuron: J. M. Russell and A. M. Brown ................................. 1475
GABA Catabolism: Localization of Succinic Semialdehyde Dehydrogenase in Brain Motor and Sensory Nuclei: K. L. Sims, H. A. Weisiten, F. E. Bloom ........................................ 1479
Noncytokinetic Radiation Injury: Anticoagulants as Radioprotective Agents in Experimental Radiation Hepatitis: J. Kinzie et al. ......................... 1481
Griseofulvin: A Teratogenic Study: M. F. Klein and J. R. Beall ..................... 1483
Meiosis in Tripliod All-Female Fish (Poeciliopsis, Poeciliidae):
M. C. Cimino ............................................ 1484
A Visual Pigment with Two Physiologically Active Stable States:
P. Hillman, S. Hochstein, B. Minke ........................................ 1486
Response Decrement in the Cochlear Nucleus of Decerebrate Cats during Repeated Acoustic Stimulation: G. L. Humphrey and J. S. Buchwald .......... 1488
Human Motor Cortex: Sensory Input Data from Single Neuron Recordings:
S. Goldring and R. Ratcheson .......................................... 1493

Cover

View of Alaska from space on a rare, cloud-free day. Snow blankets much of the land area. Trees, obscuring the snow, appear as dark areas. Picture was taken by Nimbus IV Image Dissector Camera System (scale, approximately 1:15,000,000). See page 1423. [National Aeronautics and Space Administration, Greenbelt, Maryland]
