Science is published weekly, except the last week in December, but with an extra issue on the third Tuesday in November, by the American Association for the Advancement of Science, 1515 Massachusetts Ave., NW, Washington, D.C. 20005. Now combined with The Scientific Monthly. Second-class postage paid at Washington, D.C. Copyright © 1972 the American Association for the Advancement of Science. Annual subscription $20; foreign postage: Americas $3; overseas $5; air freight to Europe, North Africa, Near East $ single copies $1 (back issues, $2) except Guide to Scientific Instruments which is $4. School year subscription: 9 months, $15; 10 months, $16.75. Provide 4 weeks notice of change of address, giving new and old address and zip codes. Send a recent address label. SCIENCE is indexed in the Reader's Guide to Periodical Literature.
Pressure Measurement Made by the Utilization of Ruby Sharp-Line Luminescence:

Man’s impact on the morphology of North Carolina islands is obvious when the cover photo (taken in the early 1930's) of the Cape Hatteras Lighthouse and vicinity is compared with recent photo (below) of the same area. Although the National Park Service has been successful in stabilizing parts of the islands, the process may have serious geologic implications. See page 286.
