Book Reviews

American Medicine and the Public Interest, reviewed by C. Rosenberg; Hunters, Fishers and Farmers of Eastern Europe, 6000–3000 B.C., S. Milias-Arceas; Mammals of the Sea, D. W. Rice; Magnetic Resonance in Metals, P. Sheng; The Optical Aurora and The Radiating Atmosphere, M. H. Rees; The Organic Compounds of Germanium, F. Glockling; Books Received

Reports

Capture Resonance of the Asteroid 1685 Toro by the Earth: L. Danielsson and W.-H. Ip

Montmorillonite: Electron Diffraction from Two-Dimensional Single Crystals: H. E. Roberson and K. M. Towe
Plutonium-244 Fission Tracks: Evidence in a Lunar Rock 3.95 Billion Years Old: I. D. Hutcheon and P. B. Price ................................................................. 909
Valinomycin Crystal Structure Determination by Direct Methods: W. L. Duax et al. ................................. 911
Revegetation following Forest Cutting; Mechanisms for Return to Steady-State Nutrient Cycling: P. L. Marks and F. H. Bornmann ........................................ 914
Hydroxyproline Heterooligosaccharides in Chlamydomonas: D. H. Miller, D. T. A. Lamport, M. Miller .......................................................... 918
An Eagle's Eye: Quality of the Retinal Image: R. Schlaer ................................................................. 920
Noradrenaline Nerve Terminals in Human Cerebral Cortices: First Histochemical Evidence: B. Nyström, L. Olson, U. Ungrstedt ................................................................. 924
Triacylglycerols Characteristic of Porpoise Acoustic Tissues: Molecular Structures of Diisovaleroylglucerycides: U. Varanasi and D. C. Malins .................................................. 926
Call Types of the Rana pipiens Complex in Illinois: L. E. Brown and J. R. Brown ................................................................. 928
Zinc in Entamoeba invadens: R. S. Morgan and R. F. Sattilaro ................................................................. 929
L-α-Methyl-α-hydrazino-β-(3,4-dihydroxyphenyl) propionic Acid: Relative Lack of Antidecarboxylase Activity in Adrenals: A. Horita, X. Nair, A. E. Hamilton .................................................. 931
Synthetic Polypeptide Antagonists of the Hypothalamic Luteinizing Hormone Releasing Factor: W. Vale et al. ................................................................. 933
Effects on Humans of Δ^8-Tetrahdrocannabinol Administered by Smoking: M. Galanter et al. ................................................................. 934
Natural Selection for Müllerian Mimicry in Heliconius erato in Costa Rica: W. W. Benson ................................................................. 936
Feedback: Real-Time Delayed Vision of One's Own Tracking Behavior: W. M. Smith ................................................................. 939
Patterns in Productivity of Scientists: A. Roe ................................................................. 940
Biochemical Transfer of Relational Responding (Transposition): L. W. Braud and W. G. Braud ................................................................. 942
Technical Comments: Evaporation Retardation by Monolayers: W. W. Mansfield; K. J. Mysels; J. Wu ................................................................. 944

COVER
African Serpent Eagle (Dryotriorchis spectabilis). When optimally accommodated, this eagle's image of the photographer is much sharper than the photographer's own retinal image of the bird. See page 920. [Photograph by Lionel G. Standing, Chicago Wesley Memorial Hospital, Chicago, Illinois]
