LETTERS
Dionysians and Apollonians: A. Szent-Györgyi; Science Education: W. H. Oldendorf ........................................ 966

EDITORIAL
Another Crusade!: I. H. Page ........................................ 967

ARTICLES
Implications of a Systems Approach to Oceanography: J. J. Walsh ........................................ 969
Third Lunar Science Conference: Lunar Sample Analysis Planning Team ........................................ 975
The Nature of the Darwinian Revolution: E. Mayr ........................................ 981
The Welfare of Science in an Era of Change: W. Bevan ........................................ 990

NEWS AND COMMENT
Institute of Medicine: Taking on Study of Cost of Medical Education ........................................ 997
Higher Education Bill in House ........................................ 998
Astronomy at Cambridge: A Reshuffle Not According to Hoyle ........................................ 999
Netherlands: Dutch Continue to Reclaim Land from the Sea ........................................ 1002

RESEARCH NEWS
Computer-Assisted Instruction: Many Efforts, Mixed Results ........................................ 1005

BOOK REVIEWS
On the Volterra and Other Nonlinear Models of Interacting Populations, reviewed by S. A. Boorman; Water Pollution Microbiology and Biochemical Ecology of Water Pollution, J. T. Staley; The Study of Animal Bones from Archaeological Sites, D. Perkins, Jr.; Pharmacological and Biophysical Agents and Behavior, J. A. Harvey; The Ontogenesis of Grammar, E. Shipley; Lectures on Celestial Mechanics, J. D. Mulholland ........................................ 1007

REPORTS
Partial Pressure of Gases Dissolved at Great Depth: W. O. Fenn ........................................ 1011
Lunar Crust: Structure and Composition: M. N. Toksöz et al. ........................................ 1012
Crystal Structure of the Solid Electrolyte (C₅H₅NH)Ag₅I₆ at −30°C: S. Geller ........................................ 1016

BOARD OF DIRECTORS
MINA REES
Retiring President, Chairman

GLENN T. SEABORG
President

LEONARD M. RIESER
President-Elect

DAVID BLACKWELL
Richard N. Bolt

LEWIS M. BRAHMS
BARry COMMONER

VICE PRESIDENTS AND SECTION SECRETARIES
MATHMATICS (A)
John W. Tukey
F. A. Ficken

PHILOSOPHY (B)
Herbert Friedman
Rolf M. Sinclair

SOCIAL AND ECONOMIC SCIENCES (K)
James S. Coleman
Harvey Sapolsky

AGRICULTURE (O)
Roy L. Lovorn
Michael A. Farrell

INDUSTRIAL SCIENCE (P)
Jacob E. Goldman
Jordan D. Lewis

EDUCATION (Q)
Lloyd K. Johnson
Philip R. Fordyce

PSYCHOLOGY (I)
Dale B. Harris
William D. Garvey

PHARMACEUTICAL SCIENCES (N)
Linwood F. Rice
John Aitken

PHYSICS (B)

SCIENCE is published weekly, except for the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Ave., NW, Washington, D.C. 20005. This issue is the 2 June 1972 edition. SCIENCE is indexed in the Reader's Guide to Periodical Literature.

Environmental Applications of the Weibull Distribution Function: Oil Pollution: P. G. Mikolaj ........................................... 1019

Drift of Continental Rafts with Asymmetric Heating: L. Knopoff, K. A. Poehls, R. C. Smith .................................................. 1023

Genetic and Immunological Complexity of Major Histocompatibility Regions: F. H. Bach et al. .................................. 1024

Specific Inhibition of Plaque Formation to Phosphorylcholine by Antibody against Antibody: ....................................................... 1027

Biosynthesis of C4 (Fourth Component of Complement) by Hybrids of C4-Deficient Guinea Pig Cells and Hela Cells: H. R. Colten and R. Parkman ........... 1029

Carbonic Anhydrase and Bone Remodeling: Sulfonamide Inhibition of Bone Resorption in Organ Culture: C. Minkin and J. M. Jennings .................................. 1031

Reversion of Murine Sarcoma Virus Transformed Mouse Cells: Variants without a Rescuable Sarcoma Virus: P. J. Fischinger et al. ........................... 1033

Sex Differences in Electric Signaling in an Electric Fish: C. D. Hopkins ................................................................. 1035

Photoreversible Pigment: Occurrence in a Blue-Green Alga: J. Scheibe ...................................................................................... 1037

Gamma-Aminobutyric Acid: Role in Primary Afferent Depolarization: J. L. Barker and R. A. Nicoll ................................................ 1043

Depression and Later Enhancement of the Critical Flicker Frequency during Prolonged Monocular Deprivation: J. P. Zubek and M. Bross .................. 1045

Gratings Mask Bars and Bars Mask Gratings: Visual Frequency Response to Aperiodic Stimuli: N. Weinstein and J. Bisaha ....................... 1047

Simulation models are necessary tools in studies of total marine ecosystems. Through a family of such models, it may be possible to predict and manage the perturbations of marine coastal areas. See page 969. [B. J. Nixon, Williamsburg, Virginia]
