**SCIENCE, VOL. 176**
Sigma Insoluble Enzymes are produced by reacting the conventional “soluble” enzyme with an inert base that results in an insoluble compound retaining the activity of the original enzyme. This is one of the most exciting developments in Biochemistry in recent years. Applications are almost unlimited. By selecting the “inert” base carefully, a highly active “resin” or “gel” can be produced with which the enzyme reaction can be quickly catalyzed by momentary contact with the substrate in a suitable medium.

Many different kinds of inert bases can be used as the matrix for attaching the enzyme. At present, we offer Insoluble Enzymes attached to the Polyacrylamide, Beaded Agarose, and Cellulose & Cellulose Derivatives. Work is under way to prepare Insoluble Enzymes attached to Sephadex. We also hope to offer enzymes attached to porous glass and to soluble macro-molecules.

Numerous other combinations of enzyme and matrix are possible. Your suggestions are welcome. Until more is learned about each type of preparation, the matrix of choice remains a matter of trial and error.

**New low cost BiologicalScope...**

The Heath/Schlumberger SO-29...

**$495**

Applications. The new SO-29A provides dozens of biological and physiological recording applications, such as electrocardiograms, electroencephalograms, electrodrometers... for measuring nerve and muscle action potentials.

High sensitivity and excellent input protection... provides calibrated sensitivity ranges from 50 uV/cm to 500 mV/cm and 100 dB common mode rejection. Input protected on all ranges: greater than 500 V transient, 150 V continuous. Input bias current is less than 10 picamperes to insure more accurate measurements.

Hands-off triggering: automatic triggered time base provides 7 calibrated ranges from less than 3 sec/cm to 1 ms/cm. When the waveform is less than the trigger threshold, the timebase circuits will generate a baseline after a few seconds. There is never any doubt as to whether the experimental set-up is functioning. An external trigger input is available on the rear panel.

Transducer voltages: regulated 9 V @ 20 mA and unregulated 25 V @ 30 mA.

Recorder compatible. A rear panel output provides 1 V for every cm of deflection... especially useful for driving strip chart recorders, pen recorders, even A/D converters.

Update your lab now with the new SO-29A. Use coupon below to send for a free descriptive brochure.

**Assembled SO-29A, 17 lbs. ...............................**

**SO-29A SPECIFICATIONS — VERTICAL — Sensitivity: 50 uV/cm to 50 mV/cm in 7 calibrated ranges, variable over 1 range. Differential Input Impedance: meg Q. Common-Mode Input Impedance: > 100 meg Q. Input Bias Current: 10 pA maximum. AC Common-Mode Ratio: > 100 DB (100,000 to 1). DC Common-Mode Ratio: > 100 DB (100,000 to 1). Common-Mode Range: ± 100 V. Overload Protection: ± 150 V AC or DC, continuous Differential Mode or Common Mode. (± 250 V AC or DC transient). DC Coupled Bandwidth: DC — 3.5 kHz. Vertical position control knob pulled out). AC Coupled Bandwidth: < 1.5 kHz. Vertical position control knob pushed in.) Gain Accuracy: ± 1% maximum. Vertical Output: 1 volt/cm of vertical deflection. (Position control does not affect output level). Bandwidth at Vert Out Jack: DC — 30 kHz. HORIZONTAL — Sweep Speeds: 1 sec/cm to 1 MS/cm in 7 calibrated ranges, variable over 1 range. Sweep Accuracy: ± 5%. TRIGGERING — Trigger Source: Internal. Vert Preamp Output connected to the Trigger Input. External — Shorting bar between Vertical Preamp Output and Trigger Input must be disconnected. External Trigger Signal is then connected to the Trigger Input. Trigger Input Sensitivity: 3 cm pk-pk deflection, internal. 3 volts pk-pk, external. (Horizontal position control, knob pulled out.) Overload Protection: 150 V AC or DC continuous. Automatic Baseline: Starts 3 to 5 seconds after last trigger. GENERAL — Warm-up Time: 30 seconds. Transducer Outputs: Front panel — 9 V @ 20 mA regulated. Rear panel — 25 V @ 30 mA, unregulated. Phosphor: P 7, Graticule: 6 cm x 10 cm. Power Requirements: 105-125 V AC 50/60 Hz, 60 watts. May be required for 210-250 volt operation.) Bases: Line — 1 amper, 125 volt slow-blow, 1/4 ampere, 250 volt slow-blow. Internal — 1/4 ampere, 125 volt. Dimensions: 12 1/4" wide, 6 1/2" high and 10" deep. Weight: 14 1/2 lb.

Circle No. 60 on Readers' Service Card
The First Wide Range
Microtome-cryostat...
Temperatures from
-15°C to -50°C...
Frozen Sections
from 40μ to 1μ.

The Harris LoTemp model WRC is a two microtome-cryostats in one. A single unit that can do both routine diagnostic procedures and such sophisticated research procedures as thin section light microscopy, autoradiography, fluorescence microscopy and other histological procedures, at a cost comparable to presently available routine cryostats.

The Harris model WRC is compact ... can be moved anywhere it's needed. The cold chamber has extra room for tissue handling, storage or freeze drying. Full opening top with special access ports combines the features of a totally closed system with the easy accessibility of open top models.

Available equipped with Jung or International Equipment Corp. microtomes, or cryostat only prepared for installation of your present I.E.C. microtome. Installed stereo zoom microscope also available.

For a full description of the Harris WRC and its wide range of additional features write or call ...
PORTABLE SHAKER

This Gyrotory shaker plugs in right where you want it—in a bench-top incubator, in a refrigerator, or in any corner of your lab. It is small in size, low in price, yet built with the same power and precision that drives large New Brunswick Shakers. The rugged rotator provides low agitation rates for tissue culture studies, and can be “revved” up to 400 rpm for prolonged studies requiring vigorous aeration and mixing.

The G2 Rotator not only shakes continuously, it shakes accurately. Speed is controlled electronically and is indicated on an electrical tachometer. Rate of agitation remains constant even with unbalanced loads or normal voltage fluctuations.

Choose from 18 different shaker platforms for Erlenmeyer flasks, test tubes and beakers.

Write for Bulletin No. G2S/672

BIOLOGICAL EFFECTS OF POLYNUCLEOTIDES

Edited by Robert F. Beers, Jr., Johns Hopkins University, Baltimore, MD. Werner Braun, Rutgers, The State University, New Brunswick, N.J.

xvi, 344 pp. 105 illus. Cloth. 1971. $24.00

The non-informational role of polynucleotides in biological processes has received increased attention during the past few years and is reflected in the content of this symposium.

The purpose of this 1970 symposium sponsored by Miles Laboratories, was to bring together investigators studying the interferon induction and adjuvant properties of polynucleotides with particular emphasis on their possible clinical applications in veterinary and human medicine as anti-viral and anti-tumor agents. The importance of other pharmacological toxic effects as well as their possible messenger roles have also been emphasized in order to provide a forum for evaluating the potential usefulness of these agents in preventive and therapeutic medicine.

SPRINGER-VERLAG NEW YORK INC.

Circle No. 63 on Readers’ Service Card

23 JUNE 1972

hardco will save you 30-40% of your animal care costs.

Every year the typical 5,000 cage facility spends around $20,000 just to maintain their obsolete bottle watering system. $20,000 just for labor.

But there's virtually no labor with a hardco automatic watering system.

And almost no labor costs. So that in about 17 months you usually get a full return on your investment.

And get to use that 30-40% savings for more important things.

Think about it. Over 450 labs have automated with hardco. And that includes some of the biggest.

We will design a system specifically for your lab, install it ourselves, train your personnel, guarantee it for two years.

The only thing we don't do is tell you how to allocate your new found funds.
MEDICAL & LABORATORY RESEARCH SCIENTISTS

Nationally known firm in the Houston, Texas area is seeking candidates available by Fall '72 for high level research positions at NASA's Manned Spacecraft Center.

- Cardiovascular Physiology—Conduct R&D programs to enhance understanding of cardiovascular functions of man in space. Functions of concern are cardiovascular hemodynamics, cardiac electrical activity, interference with regulatory mechanisms and allied body systems.

- Neurophysiology—Conduct investigative programs to enhance understanding of nervous system function of man in space. Of particular interest are cortical activity, auditory activity, vestibular function, sensory motor interactions and visual function.

- Environmental Physiology—Provide physiological evaluation, baseline, testing and research support to studies, tests and hardware programs in the Environmental Physiology Laboratory.

- Behavioral performance—Support R&D programs to enhance understanding of relationships between small group interactive processes and human performance including validation of assessment techniques and maintenance and operation of integrated performance assessment systems.

- Food Sciences and Nutrition—Perform aerospace food development and testing, microbiology exploration, and recycling systems development. Conduct studies in applicable areas required for food systems design for manned space flight.

The above positions will report directly to the Project Manager and require a Ph.D. degree and experience in one or more of the areas listed.

Submit resume to P.O. Drawer N, Webster, Texas 77598.
All inquiries held in strict confidence.

An Equal Opportunity Employer

Michigan State University
BIOLOGICAL SCIENCE PROGRAM
DEPARTMENT OF MICROBIOLOGY & PUBLIC HEALTH

Applications are invited for a new joint Assistant Professorship beginning 1 September 1972 between the two units listed above. Primary teaching responsibilities will be in the Biological Science Program, a series of courses in General Biology for students majoring in a number of associated areas. Office space, graduate instruction, and so forth, will be affiliated with the Department of Microbiology & Public Health. Applicants should be particularly skilled in undergraduate instruction, and also be able to take advantage of membership in a department with extensive research commitments. Candidates with interests in biochemistry or genetics or both are particularly sought.

Please apply to:

Professor Stephen C Bromley
Director Biological Science Program
Michigan State University
East Lansing, Michigan 48823

An Equal Opportunity Employer

Anatomists

The college will be pleased to receive applications for appointment to newly created positions in the Department of Anatomy. Teaching experience in the anatomical sciences is desirable but not necessary. Rank and salary commensurate with ability and background. Please submit requested salary requirements. In confidence, to: Chairman, Department of Anatomy, Philadelphia College of Osteopathic Medicine, 44th Street, Philadelphia, Pa. 19139.

Associate, Ph.D.

Experienced in isolation and purification of proteins and amino acid sequence. Experience in immunohemacytometry desirable. Large Eastern Medical School.

Box 284, SCIENCE

Klett Summerson
Photoelectric Colorimeter

No. 800-3

Test Tube Model

Klett COLONY MARKER and TALLY

This instrument takes the drudgery and error out of the counting of bacterial colonies.

Klett MANUFACTURING CO., INC.,
179 East 87th Street, New York, 28, N.Y.

Circle No. 90 on Readers' Service Card

Electron Microscopist

To assist Pathologist in ultrastructural studies in experimental pathology. Primary responsibility will be to process biological specimens into quality ultra-thin specimens. Opportunity to integrate work in current research program. QUALIFICATIONS: Must have B.S. or M.S. in biomedical science with training and experience in electron microscopy.

Salary dependent on educational background and experience

Send complete résumé including salary requirements to M. F. Murray, Professional Employment Coordinator

THE UPJOHN COMPANY
7171 Portage Road
Kalamazoo, Michigan 49001

An Equal Opportunity Employer

Cellular Immunologist

Undergraduate and Graduate teaching. Research program required. Faculty, The Ohio State University. Rank and salary open. Send vita.

Faculty Search Committee, Department of Microbiology 484 S. 12th Columbus, Ohio 43210

An equal opportunity employer

Fermentation Specialist

Pitman-Moore, Inc., has an opening for an experienced Fermentation Specialist to handle large-scale product fermentation for bacteria production. A degree in microbiology is helpful but 1 to 3 years of experience would be most desirable. Pitman-Moore, Inc., a subsidiary of Johnson & Johnson, has opened a new facility in Washington Crossing, N.J. Interested candidates are invited to send résumé detailing background and salary requirements to Personal Manager, Pitman-Moore, Inc., P.O. Box 244, Washington Crossing, N.J. 08560. An equal opportunity employer.

Developmental Biologist, Ph.D. or Equivalent

Research Associate, September 1972. Appointment for the year to work on insect cytochrome P-450. Applications, including curriculum vitae should be sent to Mr. C. W. Westerfield Administrative Assistant Department of Zoology University of Georgia Athens, Georgia 30601 no later than 25 July 1972.

Biochemist

Postdoctoral experience in developmental biology, with strong background in biochemistry. Interest in pharmacology-toxicology also desirable. Will be working with a team of investigators on the action of chemical teratogens on the non-human primate embryo. Send résumé to Director, University of California Primate Research Center, Davis, California 95616.

Upjohn

7171 Portage Road
Kalamazoo, Michigan 49001

An Equal Opportunity Employer
PHARMACOLOGIST—PH.D.

A new position is now available in the FARBBWERKE HOECHST Research Center, Frankfurt West Germany. This position requires a Ph.D. in Pharmacology with interests in the field of psychopharmacology or general pharmacology. We would prefer a candidate with a background in completing post-doctoral work or with 1-5 years of industrial or academic research experience.

Excellent new facilities near the Main River in one of the largest and most modern research complexes in Europe. Initial initial will be conducted at AMERICAN HOECHST in the United States. Send curriculum vitae to Mr. R. Groben,

American Hoechst Corporation
Route 202-206 North
Somerville, N.J. 08876

An Equal Opportunity Employer M/F

Ph.D. MICROBIOLOGIST

Primary interest in research related to the infection of suppressed patients. Multidisciplinary research group with well-equipped laboratories and 22-bed research unit. For further information contact: G. A. Andrews, M.D., Chairman, Medical Division, Oak Ridge Associated Universities, P.O. Box 117, Oak Ridge, Tennessee 37830. “An Equal Opportunity Employer.”

PLANT PHYSIOLOGIST OR PLANT ECLOGIST

To teach botany, plant physiology, and ecology. Ph.D. required; rank of assistant professor; salary $9,500, with appointment to undergraduate educational position important; research encouraged. Equal opportunity employer. Send credentials and three letters of reference to Dr. William H. Gotowald, Jr., Coordinator, Department of Biology, Utica College of Syracuse University, Utica, New York 13502.

POSTDOCTORAL FELLOW

Drosophila geneticist interested in studying the genetic control of sperm morphogenesis in collaboration with a biochemist and cell biologist. A 1-year appointment with possibility of renewal. Apply to:

Dr. Lucien Haot, Directeur, Département de Biologie Université Laval Quebec 10, Canada

HAZLETON LABORATORIES, specializing in the life and environmental sciences, has an immediate opening for an Immunologist with particular interest in viral oncogenes and the role of viral agents in human tumors. Duties include design, coordination, and assisting in research programs associated with medical microbiology, virology, and other specialties. Please send resume to James R. Lacko, Personnel Manager, HAZLETON LABORATORIES, INC., a Subsidiary of Environmental Sciences Corporation, 2100 Lesseburg Turnpike, Vienna, Virginia 22180.

An Equal Opportunity Employer

LABORATORY RESEARCH ASSISTANT

Aid in biochemical studies of mammalian cells in culture. Experience with cell culture techniques is essential. Prefer M.A. degree, but B.A. acceptable. Contact

R. A. Massa, Personnel Director
Westney University
Middletown, Conn. 06457

An Equal Opportunity Employer M/F

MICROBIOLOGIST / BIOCHEMIST

Infectious disease research

Exceptional opportunity for a Ph.D. Microbiologist with a strong background in Biochemistry, or a Ph.D. Biochemist with a strong background in Microbiology, to carry out fractionation and purification studies leading to the development of bacterial and viral vaccines. Should have at least 3 to 5 years postdoctoral experience and working knowledge of a variety of biochemical techniques.

Compensation in line with qualifications. Please send résumé, with salary history, to Mr. C. L. Hill.

LEDERLE LABORATORIES
American Cyanamid Co.
Pearl River, New York 10965

An equal opportunity employer, M/F

NEUROPHYSIOLOGIST

Recent Ph.D. Position is primarily teaching with limited research in an integrated program. Rank and salary open. Contact:

Dr. Roger Senty, Dean
College of Osteopathic Medicine
and Surgery
236 St. Paul’s
Des Moines, Iowa 50309

MONASH UNIVERSITY
Melbourne, Australia

DEPARTMENT OF PSYCHOLOGY
LECTURER

Applications are invited for appointment as Lecturer in the Department of Psychology. The Department wishes to establish a strong research program in this field with applications from persons whose interests are in any area of experimental, social, or applied psychology. The Department of Psychology which is in the Faculty of Science teaches a major and honors course in that Faculty. There are currently 14 staff and 12 research students. Research interests extend over a broad range of experimental psychology. Applicants should normally have both teaching experience and a higher degree or equivalent research qualifications.

Salary range: Lecturer: $A6697 to $A9256 per annum. Assistant Lecturer: $A4770 to $A6697 per annum. Salary will be determined on an endowment assurance scheme, the employee and employer contributing 3 percent and 10 percent respectively.

Benefits: Travel expenses for appointee and family; removal allowance; repatriation after 3 years appointment if desired; temporary housing for an initial period; availability of loans for home purchase, study leave entitlement accumulated at the rate of 1 month's leave for each 5 months' service up to 6 years, with provision for financial assistance.

Further general information and details of application procedures are available from the Acting Academic Registrar, Monash University, Wellington Road, Clayton, Victoria 3168. Inquiries about the department should be sent to the Acting Chairman, Professor R. W. Cumming. Closing Date: 9 August 1972.

The University reserves the right to make no appointment or to appoint by invitation.

VETERINARY PATHOLOGIST

The Food and Drug Administration's new National Center for Toxicological Research, Phe Bluff, Ark., has immediate openings for the following positions:

ASSOCIATE DIRECTOR FOR PATHOLOGY. Directs all pathology, clinical pathology, and related support service operations and pathological research endeavors of the center. One primary responsibility will be to conduct applied research, either in-house or through contract to develop techniques for automation in the pathology operation as possible. D. V. M. and Ph.D. in pathology are required, plus a strong history in animal histopathology including experience in managing a pathology research operation. Salary is $25,583 to $33,260.

SENIOR VETERINARY PATHOLOGIST. Supervises a group of pathologists in preparations and in examining tissues for abnormalities. Conducts research in histo-chemistry. D. V. M. and M. S. or Ph.D. in Pathology. Strong background in animal histopathology necessary. Salary is $25,583 to $33,260.

VETERINARY PATHOLOGISTS (THREE POSITIONS). Assist senior pathologists in microscopic examination of tissues and in the conduct of histo-chemistry research. D. V. M. and M. S. Salary is $15,866 to $28,348.

Major relocation expenses to Phe Bluff, Arkansas, will be provided. A statement of citizenship is required. Send resume (transcripts and list of positions desired) or Federal Application Form SF-171 to:
