The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

Cover
First known tornado cloud to be photographed (Miner County, South Dakota, 28 August 1884). More Southerners than Northerners are killed by tornadoes, a fact that may be related to differences in psychology. See page 1386. [Library of Congress; obtained from U.S. Weather Bureau; the photograph was probably taken by F. N. Robinson]
