SCIENCE is published weekly, except the last week in December, with an extra issue on the third Tuesday in November, by the American Association for the Advancement of Science, 1515 Massachusetts Ave., NW, Washington, D.C. 20005. New combined with The Scientific Monthly®. Second-class postage paid at Washington, D.C. Copyright © 1972 by the American Association for the Advancement of Science. Annual subscription $20; foreign postage: Americas $3; overseas $6; air freight to Europe, North Africa, Near East $10; single copies $1 (back issues, $2) except Guide to Scientific Instruments which is $4. School year subscription: 9 months, $15; 10 months, $16.75. Provide 4 weeks notice for change of address, giving new and old address and zip codes. Send a recent address label. SCIENCE is indexed in the Reader's Guide to Periodical Literature.
Carbon: A Suggested New Hexagonal Crystal Form: A. G. Whittaker
and G. M. Wolten .................................................. 54
Evidence for the Neutral Hypothesis of Protein Polymorphism: T. Yamazaki and
T. Maruyama .......................................................... 56
Human-Mouse Cell Hybrids: A Suggestion of Structural Mutation for Dipeptidase-2
Deficiency in Mouse Cells: T. B. Shows, J. May, L. Haley ............................................. 58
Virions from Progressive Multifocal Leukoencephalopathy: Rapid Serological
Identification by Electron Microscopy: J. B. Penney, Jr., et al. ........................................... 60
Chromatid Breakage: Differential Effect of Inhibitors of DNA Synthesis during
G2 Phase: M. Karon and W. F. Benedict ................................................................. 62
Membrane Permeability: Cation Selectivity Reversibly Altered by Salicylate:
H. Levitan and J. L. Barker ................................................................. 63
Cell Culture on Artificial Capillaries: An Approach to Tissue Growth in vitro:
R. A. Knazek et al. ......................................................... 65
Chemical Trail-Following by Flying Insects: A Mechanism for Orientation to a
Distant Odor Source: S. R. Farkas and H. H. Shorey .......................................................... 67
Expression of Lactate and Malate Dehydrogenases in Tumors Induced by SV40 and
7,12-Dimethylbenz(a)anthracene: R. Prasad, N. Prasad, S. S. Tevetia .................. 70
Self-Stimulation in the Ventromedial Hypothalamus: G. G. Ball ...................................... 72
Taste Stimuli: Time Course of Peripheral Nerve Response and Theoretical Models:
J. R. Faull and B. P. Halpern ................................................................. 73
6-Hydroxydopa Depletion of Brain Norepinephrine and the Facilitation of
Aggressive Behavior: N. B. Thoa et al. ......................................................... 75
Technical Comments: Uranium in Runoff: R. D. Munson; R. F. Spalding and
W. M. Sackett; Cometary Hydrogen and Hydroxyl Comas: M. K. Wallis;
A. H. Delsemme ......................................................... 77

AAAS ANNUAL MEETING Health and Biology ................................................................. 79

COVER
Salton Sea and Imperial Valley of California looking toward Arizona. The valley is lengthening at up to
5 centimeters per year by crustal spreading motions on the San Andre-
as, San Jacinto, and Elsinore fault systems. See page 15. [Gemini V
