27 October 1972
Vol. 178, No. 4059

LETTERS
Population Ethics: L. J. Johnson; G. Nettler; J. C. Montgomery; T. D. Perrine; O. Vauriau; L. G. Humphreys; D. Callahan; Research Natural Areas: S. D. Veirs; Safety at Rocky Flats: E. A. Martell; Understanding Science: M. Goran

EDITORIAL
Energy Conservation

ARTICLES
Aging: Noncycling Cells an Explanation: S. Gelbart and J. G. Smith, Jr.
Fourier Transform Spectroscopy: E. D. Becker and T. C. Farrar
The Ortega Hypothesis: J. R. Cole and S. Cole

NEWS AND COMMENT
Scientists in Politics: A Late Entry for Nixon's Group
Medicine at Michigan State (IV): Osteopaths and Allopaths
Health Fad Underworld Surveyed
Europe and the Environment: Cooperation a Distant Prospect

RESEARCH NEWS
The 1972 Nobel Prize for Physiology or Medicine
Magnetohydrodynamic Power: More Efficient Use of Coal
Polychlorinated Biphenyls: Still Prevalent, but Less of a Problem

BOOK REVIEWS
Geographical Ecology, reviewed by T. W. Schoener and by S. A. Boorman; Nongcun yisheng shouce (Peasant Village Physician's Handbook), H. Agren;
Books Received

BOARD OF DIRECTORS
MINA REES

SCIENCE is published weekly, except the last week in December, but with an extra issue on the third Tuesday in November, by the American Association for the Advancement of Science, 1515 Massachusetts Ave., NW, Washington, D.C. 20005. Now combined with The Scientific Monthly®. Second-class postage paid at Washington, D.C. Copyright © 1972 by the American Association for the Advancement of Science. Annual subscription $20; foreign postage: Americas $3; overseas $5; air freight to Europe, North Africa, Near East $15; single copies $1 (back issues, now) except Guide to Scientific Instruments which is $4. School year subscription: 9 months, $15; 10 months, $16.75. Provide 4 weeks notice for change of address, giving new and old address and zip codes. Send a recent address label. SCIENCE is indexed in the Reader's Guide to Periodical Literature.
REPORTS

Precision Geodesy via Radio Interferometry: H. F. Hinteregger et al. .................. 396
Quaternary Paleotemperatures and the Duration of the High-Temperature Intervals:
C. Emilianii .............................................................. 398
Lead Aerosol Baseline: Concentration at White Mountain and Laguna Mountain,
California: T. J. Chow, J. L. Earl, C. B. Snyder .................................. 401
Siliceous Algal and Bacterial Stromatolites in Hot Spring and Geyser Effluents of
Yellowstone National Park: M. R. Walter, J. Baule, T. D. Brock .................. 402
Polar Motion from Laser Tracking of Artificial Satellites: D. E. Smith et al. ........ 405
Interferometric Observations of an Artificial Satellite: R. A. Preston et al. ........ 407
Survival of Mouse Embryos Frozen to −196° and −269°C: D. G. Whittingham,
S. P. Leibo, P. Mazur ......................... 411
Brain Serotonin Content: Physiological Regulation by Plasma Neutral Amino Acids:
J. D. Fernstrom and R. J. Wurtman .................................. 414
Thyrotropin Releasing Hormone: Enhancement of Dopa Activity by a Hypothalamic
Hormone: N. P. Plotnikoff et al. ........................................ 417
Arthropod Molting Hormone: Radioimmune Assay: D. W. Borst and J. D. O'Connor 418
Coherin: A New Peptide of the Bovine Neurohypophysis with Activity on
Gastrointestinal Motility: I. Goodman and R. B. Hiatt ......................... 419
Eyes Have a Role in Photoperiodic Control of Sexual Activity of Coturnix:
K. Homma, W. O. Wilson, T. D. Stipes .................................. 421
Echinoid Spawning Induced by a Radial Nerve Factor: R. C. Cochran and
F. Engelmann .............................................................. 423

AAAS ANNUAL MEETING

The Growth Question and Environmental Policy Issues; Limits to Growth?
Achieving Public Interests in Management of Land Resources; NEPA:
In Context, in Detail, in Court ........................................ 425

COVER

“Frozen-thawed” mouse pups and the albino foster mother who gave birth
to them. The pups developed from eight-cell embryos that had been surgically
removed from brown genetic mothers, frozen to −196°C for 21
hours, thawed, and then transferred to the oviduct of the foster mother. See page 411. [P. Whittingham, S.
Leibo, and P. Mazur, Oak Ridge National Laboratory]
