Insulin Release by Emiociytosis: Demonstration with Freeze-Etching Technique: L. Ori et al. ................................................................. 82

Freeze-Fractured Acholeplasma laidlawii Membranes: Nature of Particles Observed: M. E. Tourtellotte and J. S. Zupnik ............................................. 84

Membrane Recycling: Vesiculation of the Amoeba Contractile Vacuole at Systole: J. A. McKanna ................................................................. 88

Natural Selection of Parental Ability to Vary the Sex Ratio of Offspring: R. L. Trivers and D. E. Willard ................................................................ 90

Memory and Hibernation in Citellus lateralis: M. C. McNamara and M. L. Riedesel ............................................................................. 92

Technical Comments: Dichloromethane and Lettuce Seed Germination: J. D. Anderson; L. L. Triplett and A. H. Haber; H. Meyer and A. M Mayer; Nitrosation in the Environment: Can It Occur?: C. L. Walters; M. C. Archer and S. R. Tannenbaum ......................................................... 94

COVER
Photograph of breccia boulders taken through telephoto lens by Apollo 16 astronaut Charles Duke. Blocks occur on north wall of North Ray crater. Photo is intentionally underexposed to illustrate details within shadowed areas. See page 62. [NASA photograph AS16-105-17172]
