Intracellular Plutonium: Removal by Liposome-Encapsulated Chelating Agent:  

Hyaluronate Inhibition of Chondrogenesis: Antagonism of Thyroxine, Growth  
Hormone, and Calcitonin: B. P. Toole ............................................... 302

Blood Cells Preserved in a Mummy 2000 Years Old: M. R. Zimmerman ........ 303

Cyclic AMP Phosphodiesterase in Cloned Astrocytoma Cells: Norepinephrine  
Induces a Specific Enzyme Form: P. Uzanov, H. M. Shein, B. Weiss .......... 304

26-Hydroxyecdysone: New Insect Molting Hormone from the Egg of the Tobacco  
Hornworm: J. N. Kaplans et al. ..................................................... 307

Octopamine-Sensitive Adenylate Cyclase: Evidence for a Biological Role of  
Octopamine in Nervous Tissue: J. A. Nathanson and P. Greengard ........... 308

Activation of Hemoglobin C Synthesis in Sheep Marrow Culture: J. W. Adamson  
and G. Stamatosannopoulos ....................................................... 310

Somatomedin; Inhibition of Adenylate Cyclase Activity in Subcellular Membranes of  
Various Tissues: G. P. E. Tell et al. ............................................. 312

Acetylcholine: Fast Axoplasmic Transport in Insect Chemoreceptor Fibers:  
R. Schafer ............................................................................. 315

Learning: Classical and Avoidance Conditioning in the Mollusk Pleurobranchaea:  
G. J. Mptisos and W. J. Davis ....................................................... 317

Selective Visual Experience Fails to Modify Receptive Field Properties of Rabbit  
Striate Cortex Neurons: R. R. Mize and E. H. Murphy ......................... 320

Technical Comments: Preserve Guatemalan Teosinte, a Relict Link in Corn’s  
Evolution: W. C. Galman ......................................................... 329

Nonnuclear Energy for Development: J. F. Weinhold; Transfer of Technology  
and National Economic Development: J. Baruch; Aerial Inventory of  
National Resources: J. Burns; Registration and Travel Information ........ 324

Cover
Preserved red blood cells, showing characteristic biconcavity, in a thoracic vein. The dark granules are autolyzed leukocytes. (Hematoxylin and eosin stain, about ×1400). See page 303. [Michael R. Zimmerman, Hospital of the University of Pennsylvania, Philadelphia]
