Lunar Volcanism: Age of the Glass in the Apollo 17 Orange Soil: L. Husain and O. A. Schaefier ................................................................. 1358

Late Cretaceous (Maestrichtian?) Silicoflagellates from the Alpha Cordillera of the Arctic Ocean: H. Y. Ling, L. M. McPherson, D. L. Clark ............................... 1360

Postlesion Axonal Growth Produces Permanent Functional Connections: G. Lynch, S. Deadwyler, C. Cotman .......................................................... 1364

Methionine Sulfloximine-Resistant Mutants of Tobacco: P. S. Carlson .............................................................. 1366

Δ9-Tetrahydrocannabinol and Ethanol: Differential Effects on Sympathetic Activity in Differing Environmental Setting: L. K. V. Ng et al. ........................................... 1368

Angiotensin-Sodium Interaction in Blood Pressure Maintenance of Renal Hypertensive and Normotensive Rats: H. Gavras et al. .................................................. 1369

Alcohol-Induced Hyperlipidemia and Beta Lipoproteins: J. H. Mendelson and N. K. Mello .................................................................. 1372

Sarcocystis in Mice Inoculated with Toxoplasma-Like Oocysts from Cat Feces: G. D. Wallace ................................................................. 1375

Wood-Boring Bivalves, Opportunistic Species in the Deep Sea: R. D. Turner .......................... 1377

Succession: Similarities of Species Turnover Rates: H. H. Shugart and J. M. Hett .......................................................... 1379

Testosterone Concentration in the Male Chick Brain: An Autoradiographic Survey: C. C. Meyer ................................................................ 1381

Control of Their Environment Reduces Emotionality in Rats: J. M. Jaffe, R. A. Rawson, J. A. Mulick ........................................................ 1383

Technical Comments: Geyser Eruptions and the 18.6-Year Tidal Component: R. D. Geer; J. S. Rinchart .................................................. 1384

Scanning electron micrograph of Valuacerta siderea (Schulz), a Late Cretaceous silicoflagellate species, from Fletcher's Ice-Island (T-3) core 437 sediments from the Alpha Cordillera of the Arctic Ocean (original size from tip of vertical point to base of star-shaped figure, 80 micrometers). See page 1360, [H. Y. Ling and Linda M. McPherson, University of Washington, Seattle; D. L. Clark, University of Wisconsin, Madison]
