BOOK REVIEWS  
Rotation of the Earth, reviewed by D. E. Smylie; Physics in the Twentieth Century, J. Ziman; Aerosols and Atmospheric Chemistry, V. A. Mohlen; Stone, W. D. Keller; Proteins, F. Wold; Books Received 

REPORTS  
Toxic Metal Fumes from Mantle-Type Camp Lanterns: K. Griggs 
Mercury in the Greenland Ice Sheet: Further Data: R. A. Carr and P. E. Wilkins 
Contemporary Phosphorites on the Continental Margin of Peru: H. H. Veel, W. C. Burnett; A. Soutar 

SCIENCE is published weekly, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Ave., NW, Washington, D.C. 20005. New combined with The Scientific Monthly. Second-class postage paid at Washington, D.C. Copyright © 1973 by the American Association for the Advancement of Science. Member rates on request. Annual subscription: $30; foreign postage: America $4, overseas $6, air lift to Europe $8. Single copies $1 (back issues, $2) except Guide to Scientific Instruments which is $4. School year subscriptions: 9 months $22.50; 10 months $25. Provide 4 weeks notice of change of address, giving new and old address and zip codes. Send a recent address label. Science is indexed in the Reader’s Guide to Periodical Literature.
Human Chorionic Gonadotropin: Its Possible Role in Maternal Lymphocyte Suppression: E. W. Adcock III et al. .......................................................... 845
Synergism of Insecticides by Herbicides: E. P. Lichtenstein, T. T. Liang, B. N. Anderegg .......................................................... 847
Peroxidase Mediated Antimicrobial Activities of Alveolar Macrophage Granules: B. B. Paul et al. ....................................................... 849
Failure of Limiting Antigen Doses to Selectively Stimulate High-Avidity Memory Cells: D. Segre and M. Segre ........................................... 851
Insomnia with Sleep Apnea: A New Syndrome: C. Guillemainault, F. L. Eldridge, W. C. Dement .......................................................... 856
Glutamate Uptake by the Isolated Toad Brain: R. P. Shank, J. T. Whiten, C. F. Baxter .......................................................... 860

Plasma Membranes: Isolation from Naturally Fused and Lysolecinin-Treated Muscle Cells: M. Reporter and D. Raveed ......................................... 863
N'-Acetyl-D-halfosaminidase: Role in the Degradation of Glycosaminoglycans: J. N. Thompson et al. .......................................................... 866
Membrane-Associated Particles: Increase at Sites of Pinocytosis Demonstrated by Freeze-Etching: L. Ori and A. Perrelet ........................................... 868
Natural Abundance Carbon-13 Nuclear Magnetic Resonance Spectra of the Canine Sciatic Nerve: E. Williams et al. .................................................. 869
Genetic Control of Susceptibility to Experimental Allergic Encephalomyelitis in Rats: D. L. Gasser et al. .......................................................... 872
Clarification of the Chemical Status of the Pink Bollworm Sex Pheromone: H. E. Hummel et al. .......................................................... 873
Pavlovian Conditioning with Heat Reinforcement Produces Stimulus-Directed Pecking in Chicks: E. A. Wasserman .................................................. 875
Disparity Detectors in Human Depth Perception: Evidence for Directional Selectivity: D. Regan and K. I. Beverley ........................................... 877

Stone decay in the industrial atmosphere of the Rhein-Ruhr; sculpture is of porous Baumberg sandstone (Upper Cretaceous) at Herten Castle near Recklinghausen, Westphalia, Germany, built in 1702. (Left) Appearance in 1908, with light to moderate damage. (Right) Appearance in 1969, showing almost complete destruction. See review of Stone, page 839. [Schmidt-Thomsen, Landesdenkmalamt, Westfalen-Lippe, Muenster, Germany]
