Stone decay in the industrial atmosphere of the Rhein-Ruhr; sculpture is of porous Baumberg sandstone (Upper Cretaceous) at Herten Castle near Recklinghausen, Westphalia, Germany, built in 1702. (Left) Appearance in 1908, with light to moderate damage. (Right) Appearance in 1969, showing almost complete destruction. See review of Stone, page 839. [Schmidt-Thomsen, Landesdenkmalamt, Westfalen-Lippe. Muenster, Germany]
