The American Association for the Advancement of Science was founded in 1848 and incorporated in
1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to
improve the effectiveness of science in the promotion of human welfare, and to increase public under-
standing and appreciation of the importance and promise of the methods of science in human progress.

COVER

With the increased use of computers gas record-keeping devices, action to
protect the privacy and confidentiality of these records must be taken. The
negative sandwich montage symbolically illustrates the great potential of au-
tomation in the service of the mentally ill. See page 797. [Sidney Bernstein,
Research Center, Rockland State Hos-
pital, Orangeburg, New York]
