SCIENCE is published weekly, except the last week in December, but with an extra issue on the fourth Tuesday in November, by the American Association for the Advancement of Science, 1515 Massachusetts Ave., NW, Washington, D.C. 20005. Now combined with The Scientific Monthly. Second-class postage paid at Washington, D.C. Copyright 1973 by the American Association for the Advancement of Science. Member rates on request. Annual subscription $30; foreign postage: Americas $4, overseas $6; air lift to Europe $3. Single copies $1 (back issues, $2) except Guide to Scientific Instruments which is $4. School year subscriptions: 9 months $22.50; 10 months $25. Provide 6 weeks notice of change of address, giving new and old address and zip codes. Send a recent address label. Science is indexed in the Reader's Guide to Periodical Literature.

**COVER**

Twin monolithic quartzite statues of the Egyptian pharaoh Amenhotep III (18th dynasty, circa 1400 B.C.) are identified in classical times with the Greek hero Memnon. Research in 1971 and 1972, supported by the National Geographic Society, showed that each statue weighs 720 metric tons and stands 14.3 meters above its pedestal block. The material was secured at Gebel el Ahmar, 420 miles downstream on the Nile. See page 1219. [Fred Stross, University of California, Berkeley]
