8 March 1974

Volume 183, No. 4128

LETTERS
Grant Administration: V. P. White; R. J. Woodrow; Energy and the Environment: J. McCarthy; The University Department: J. Stokes III; M. Goran; R. Straus

EDITORIAL
Ignorance as the Driving Force: N. Hackerman

ARTICLES
Atmospheric Effects of Pollutants: P. V. Hobbs, H. Harrison, E. Robinson
Selenium Biochemistry: T. C. Stadtman
What Happened at Hawthorne?: H. M. Parsons

NEWS AND COMMENT
Insurance Dominates Health Message
Sterilization Regulations: Debate Not Quelled by HEW Document
The Presidential Prize Caper: Non-Winners Revealed

RESEARCH NEWS
Chemical Carcinogenesis: A Long-Neglected Field Blossoms

BOOK REVIEWS
The Meaning of Fossils, reviewed by T. J. M. Schopf; Foundations of Scientific Method, R. Smith; South Asian Archaeology, R. H. Dyson, Jr.; Comparative Morphology of the Mammalian Ovary, C. R. Austin; Behavioral Embryology, J. S. Rosenblatt; A Plague of Corn, B. G. Rosenkranz; Books Received

REPORTS
Low-Loss Niobium-Tin Compound for Superconducting Alternating-Current Power Transmission Applications: M. Suenaga and M. Garber .......................................................... 952
Melting Relations of the Allende Meteorite: M. G. Seitz and I. Kushiro .................................................. 954
Light Flashes Observed by Astronauts on Apollo 11 through Apollo 17: L. S. Pinsky et al. ........................................ 957
Eustatic Sea Level 120,000 Years Ago on Oahu, Hawaii: T.-L. Ku et al. .................................................. 959
Immunoglobulin Structure: Amino Terminal Sequences of Mouse Myeloma Proteins That Bind Phosphorylcholine: P. Barstad et al. .................................................. 962
Choline Content of Rat Brain: W. B. Stavinoha and S. T. Weintraub .................................................. 964
Mapping Human Autosomes: Evidence Supporting Assignment of Rhesus to the Short Arm of Chromosome No. 1: W. L. Marsh et al. .................................................. 966
Calcification on an Unstable Substrate: Marginal Growth in the Mollusk Pecten diegensis: G. R. Clark .......................................................... 968
Suppressing Drosophila Circadian Rhythm with Dim Light: A. T. Winfree .................................................. 970
Disruption of Gypsy Moth Mating with Microencapsulated Disparlure: E. A. Cameron et al. .................................................. 972
Infant Color Perception: J. F. Fagan III .................................................................................. 973
Inhibition of Neighboring Motoneurons in Conscious Control of Single Spinal Motoneurons: H. McC. Smith, Jr., J. V. Basmajian, S. F. Vanderstoep .................................................. 975
Technical Comments: Linearized Heat Transfer Relations in Biology: G. S. Bakken and D. M. Gates; T. H. Strunk; M. Kleiber; Sex Pheromone of the Codling Moth: L. M. McDonough and H. R. Moffit .................................................. 976
Gordon Research Conferences: A. M. Cruickshank .......................................................... 979

MEETINGS

Gordon Research Conferences: A. M. Cruickshank .......................................................... 979

PRODUCTS AND MATERIALS

Metallographic Specimen Polisher; Piezoelectric Chromatograph; Display and Scan Generator; Salinometer–Conductivity Meter; Viscometer for Polymers; Spectrophotometer; Literature .................................................. 1013

COVER

Simultaneous photographs of the east coast of North America and Greenland taken about 7:30 p.m. local time, 15 November 1972. City lights, the aurora borealis, and moonlight reflected from clouds and terrain are seen in the visible light photograph on the left. An infrared temperature image, which ranges from 210 K (white) to 310 K (black), appears on the right. See page 951. [U.S. Air Force Weather Service Satellite]
LETTERS

EDITORIAL

The “Slippery Slope” of Science: A. Etzioni ........................................... 1041

ARTICLES

Paleoclimatic Inferences from Long Tree-Ring Records: V. C. Lamarche, Jr. ........... 1043
The Economics of Resource Recovery from Municipal Solid Waste: J. G. Abert, H. Alter, J. F. Bernheisel ........................................... 1052

NEWS AND COMMENT

Velikovsky: AAAS Forum for a Mild Collision ........................................... 1059
Problems of Forbidden Knowledge ........................................... 1060
Human Nutrition ........................................... 1062
Floating Nuclear Plants: Power from the Assembly Line ...................................... 1063

RESEARCH NEWS

Viral Carcinogenesis: Role of DNA Viruses ........................................... 1066
What Is Cancer? What Forms Does It Take? How Does It Kill? ................................ 1068

BOOK REVIEWS

Alfred Binet, reviewed by R. D. Tuddenham; The Psychophysiology of Thinking, T. Shallice; Locomotion of Tissue Cells, C. S. Izzard; Embryology and Phylogeny in Annelids and Arthropods, R. L. Fernald; Barobiology and the Experimental Biology of the Deep Sea, H. W. Jannasch; Function of Naturally Occurring Polyamines, E. J. Herbst; Wave Mechanics, K. S. Pitzer; Chemistry and Functions of Colicins, F. M. Richards; Books Received ........................................... 1071
Nitrification in Paleocene Shale: J. F. Power et al. ........................................... 1077
Monolayers and Microbial Dispersal: R. J. Bandoni and R. E. Koske .......................... 1079
Host-Specific Phytotoxic Polysaccharide from Apple Tissue Infected by Erwinia amylovora: R. N. Goodman, J. S. Huang, P. Huang ........................................... 1081
Autoimmune Encephalomyelitis: Activation on Thymus Lymphocytes against Syngeneic Brain Antigens in vitro: S. Orgad and I. R. Cohen ........................................... 1083
Arachidonic Acid Causes Sudden Death in Rabbits: M. J. Silver et al. ......................... 1085
Selective Pancreatic Enzyme Secretion due to a New Peptide Called Chymodulin: J. W. Adelson and S. S. Rothman ................................................................. 1087
Radioreceptor Assay for 1α,25-Dihydroxyvitamin D₃: P. F. Brumbaugh ......................... 1089
Evidence that Enzyme Polymorphisms Are Selectively Neutral, but Blood Group Polymorphisms Are Not: T. Yamazaki and T. Maruyama ......................................... 1091
Calcium Absorption and Calcium-Binding Protein Synthesis: Solanum malacoxylon Reverses Strontium Inhibition: R. H. Wasserman ..................................................... 1092
Persistence of Cadmium-Induced Metabolic Changes in Liver and Kidney: R. L. Singhal et al. .................................................................................................................. 1094
Ecto-Enzyme of Granulocytes: 5'-Nucleotidase: J. W. DePierre and M. L. Karnovsky ................................................................. 1096
Guide to Advertised Products ......................................................................................... 1103

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
