SCIENCE is published weekly, except the last week in December, with an extra issue on the fourth Tuesday in November, by the American Association for the Advancement of Science, 1515 Massachusetts Ave., NW, Washington, D.C. 20005. Now combined with The Scientific Monthly®. Second-class postage paid at Washington, D.C. Copyright © 1974 by the American Association for the Advancement of Science. Member rates on request. Annual subscription $30; foreign postage: Americas $4, Overseas $10, Air lift to Europe $12. Single copies $1 (back issues, $2) except Guide to Scientific Instruments which is $4. School year subscription: 9 months $22.00, 10 months $25. New rates will become effective 1 May 1974. Provide 6 weeks notice for change of address, giving new and old address and zip codes. Send a recent address label. Science is indexed in the Reader's Guide to Periodical Literature.
Neonatal Thymectomy Increases the Incidence of Spontaneous and Methylcholanthrene-Enhanced Thyroiditis in Rats: D. A. Silverman and N. R. Rose .......................... 162
Pineal Gland: 24-Hour Rhythm in Norepinephrine Turnover: M. Brownstein and J. Axelrod ............................................. 163
Erythrocyte Deformation in Human Muscular Dystrophy: D. W. Matheson and J. L. Howland ............................................. 165
Parathyroid Secretion: Discovery of a Major Calcium-Dependent Protein: B. Kemper et al. .................................................. 167
Benzo[a]pyrene Metabolites: Efficient and Rapid Separation by High Pressure Liquid Chromatography: J. K. Selkirk, R. G. Cray, H. V. Gelboin .................................................. 169
Human Chromosome Banding by Feulgen Stain Aids in Localizing Classes of Chromatin: T. C. Rodman .................................. 171
Hydrogen Evolution by Nitrogen-Fixing Anabaena cylindrica Cultures: J. R. Benemann and N. M. Weare .............................. 174
Norepinephrine-Sensitive Adenylate Cyclases in Rat Brain: Relation to Behavior and Tyrosine Hydroxylase: P. Skolnick and J. W. Daly .................................................. 175
Dopamine Nerve Terminals in the Rat Limbic Cortex: Aspects of the Dopamine Hypothesis of Schizophrenia: T. Hokfelt et al. .......... 177
Cleaning Symbiosis Provides a Positive Reinforcer for Fish: G. S. Losey, Jr., and L. Margules ..................................................... 179
Orientation of Homing Pigeons Altered by a Change in the Direction of an Applied Magnetic Field: C. Walcott and R. P. Green .... 180

MEETINGS
Nutrition and New Food Technology: R. R. Gutierrez and T. C. Byerly; Environmental Mutagens: S. Bendix; Enzyme Engineering: L. B. Wingard, Jr., and E. K. Pye; Forthcoming Events ............................................. 186

PRODUCTS AND MATERIALS
Measuring Microscopes; Teflon Programmed Sampling Pump; Rotated Cells for Coulometry; Light Guides for Lasers; Contact Angle Analyzer; Optical Emission Spectrometer; Literature ............................................. 198

COVER
Flock of young homing pigeons returning to their loft. The initial orientation of individual birds released under overcast skies can be altered by changing the direction of the magnetic field around their heads. See page 180. [Lee R. G. Snyder, Stanford University, Palo Alto, California]
