MEETINGS

Susceptibility of the Fetus and Child to Chemical Pollutants: R. W. Miller; Forthcoming Events ......................................................... 812

COVER

Wet, dim lit, moss-hung cloud forest on summit of Long Island (near New Guinea), two centuries after devastation by a volcanic explosion. Although the summit forest has already regained mature structure under these perpetually moist conditions, montane birds have reconolized much more slowly than lowland birds. See page 803 [Jared Diamond, University of California Medical Center, Los Angeles]
