The first color-accurate photomicrographic
module system.

The PM-10 photomicrographic system from Olympus is the first modular camera system that not only delivers accurate exposure, but accurate color, too.

That's because its exclusive photoelectronic system includes through-the-lens auto exposure control (from 32 min. to 1/100 seconds with any film that you can name) plus through-the-lens color temperature metering and matching.

And when we say any film, we mean it: a choice of modular backs and accessories lets you shoot anything from 35mm (with automatic film advance, if desired), to Polaroid film packs, to 4x5" (plates, film packs, sheets and Polaroid sheets).

In fact, our choice of modules is so wide that it even includes an inexpensive body without automatic features—but with the same wide choice of interchangeable backs and accessories.

Whatever you're looking at now, whatever microscope you're using, there's a PM-10 system that can capture just what you see the way you see it—color or black and white.

Send for our free literature, and you'll see just what we mean.

Recording Titration System

The Titigraph (Fig. 1) automatically records standard titration curves, first derivative curves, or the kinetics of reaction solutions. A digital or analog pH meter may be used as the signal source; sensors include pH, specific ion, or other potentiometric electrodes. The amount of reagent dispensed is controlled as the speed of the reaction changes. London Company. Circle No. 867 on Readers' Service Card.

Enzymes

More than 150 purified enzymes are now available from a single supplier. Among them are choline kinase, obtained from rabbit brain, which is useful in measuring content of choline and acetylcholine in brain tissues; lactoperoxidase, obtained from milk, which finds application in studies of peroxidase-dependent reactions; and superoxide dismutase, obtained from beef erythrocytes, which facilitates the study of free radical reactions. Research Division, Miles Laboratories. Circle No. 865 on Readers' Service Card.

Animal Activity Monitor

The Varimex activity meter distinguishes between vertical movement and horizontal movement of subjects. Experimental animals and control animals may be monitored alternatively by the same control unit. The control unit houses signal oscillators, timing and tuning devices, sensitivity adjustment, and accumulating counters. Sensors of horizontal movement are inductive; sensors of vertical movement are capacitive. Systems may be designed to monitor movement under a variety of experimental conditions. Columbus Instruments Division of International Instrument Company. Circle No. 868 on Readers' Service Card.

Literature

Solid State Switches are described in bulletin S-101 for many communications applications. Raytheon Company. Circle No. 871 on Readers' Service Card.

Environmental Field Testing and Analysis Service capabilities are outlined in a brochure devoted to stack emission, high temperature sampling, odor analysis, and other environmental test applications. Particle Data Laboratories, Limited. Circle No. 872 on Readers' Service Card.

Inverted Metallurgical Microscopes describes the MEC line including features and detailed specifications. Univen Instrument Company. Circle No. 873 on Readers' Service Card.

Model 805 Waveform Recorder is the subject of a four-page brochure that includes illustrations and design features. Biomation Corporation. Circle No. 874 on Readers' Service Card.

Electron Tubes: Integrated Circuit Diodes and Transistors are catalogued in the 1974–75 price list from JSH Electronics, Incorporated. Circle No. 875 on Readers' Service Card.

Heat Systems for Laboratory and Pilot Plant Applications are illustrated in a color catalog that details furnaces of four types: tube furnaces (single-zone and three-zone), muffle furnaces, and crucible furnaces. Lindberg Division of Sola Basic Industries. Circle No. 876 on Readers' Service Card.

Newly offered instrumentation, apparatus, and laboratory materials of interest to researchers in all disciplines in academic, industrial, and government organizations are featured in this space. Emphasis is given to purpose, chief characteristics, and availability of products and materials. Endorsement by Science or AAAS is not implied. Additional information may be obtained from the manufacturers or suppliers named by circling the appropriate number on the Readers' Service Card (see pages 94A and 190C) and placing it in the mailbox. Postage is free—RICHARD G. SOMME

Sea Turtles and the Turtle Industry of
Look into our Zoom Stereomicroscope. Take your photo. You'll see exceptionally crisp, completely flat images. You'll see a superbly crafted Swiss instrument with large field diameters, ample working distance, and convenience like never before. Just attach the 35mm magazine shown in photo. Or use a Polaroid Pack Adapter, select depth of field built in double iris diaphragm, focuses on slide and take your photo.

Wild M-7A. You'll really see something.

A little something for nothing.

The Nalgene® Hand-Operated Vacuum Pump puts controllable vacuum in the palm of your hand. Weighing less than ½ pound, it attains a vacuum up to 25 in. Hg with a few easy squeezes of the handle—and can hold it for 24 hours! You monitor the exact vacuum on the gauge, calibrated in both centimeters and inches. Pumping rate is 15cc (one cubic inch) per stroke. Will also generate 7 psi positive pressure through tubing connected to the exhaust port. An integral valve allows releasing or adjusting vacuum without disconnecting the pump from the line.

This rugged, versatile vacuum pump will have many uses in schools, hospitals, laboratories, and in the field. Specify Nalgene No. 6130. An economy model, identical but without the gauge, is also available (Cat. No. 6131). Order from your Lab Supply Dealer. For full details write Dept. 4209D, Nalgene Labware Division, Rochester, New York 14602.

A SOURCE BOOK IN MEDIEVAL SCIENCE
Edward Grant, editor
This Source Book offers a rare opportunity to explore more than two centuries of European scientific thought. Chosen to represent "science" in a medieval rather than a modern sense, most of the nearly 200 selections come from the Latin West. Roughly half of them appear here in vernacular translation for the first time. Critical commentary and annotation accompany the text. Source Books in the History of the Sciences. $32.50.

DISCOVERY OF THE CONSERVATION OF ENERGY
Yehuda Elkan
An extended historical treatment of the 19th-century discovery of the conservation of energy, this study is the first to bring together considerations from metaphysics as well as science and from biology as well as physics. Harvard Monographs in the History of Science. $8.50.
To order this book Circle No. 404 on Readers' Service Card

CONTROL OF GENE EXPRESSION IN ANIMAL DEVELOPMENT
J. B. Gurdon
J. B. Gurdon has pioneered an experimental system which, by permitting genetic information to be transferred from one animal cell to another, has yielded crucial data on gene expression in development and the early stages of cell differentiation. The data that he reviews are not available in any other single source. $6.50.

ISLAND BIOLOGY
Sherwin Carquist
The unique evolutionary histories and ecological adaptations of island flora and fauna, extensively illustrated. Noting island species above average vulnerability to extinction, the author suggests that "the future may well scorn today's biologists... for failing to study endangered organisms while they are still extant." "Carquist's Island Biology is a splendid volume. It is an absolute must for every evolutionary biologist." Ernst Mayr, 1974, 656 pages, 386 halftones, 52 line drawings, $25.00.

THE GENETIC BASIS OF EVOLUTIONARY CHANGE
R. C. Lewontin
In this beautifully written volume, R. C. Lewontin surveys the many experiments using new molecular techniques that have revealed the immense wealth of hereditary variation among individuals and have quantified the genetic changes that take place in the origin of new species. This pathbreaking study in molecular evolution will surely become one of the landmarks in twentieth-century science. 1974, 352 pages. Cloth, $12.50; Paper, $4.50.

EMI 9789Q8 PHOTOMULTIPLIERS

FOR MEASUREMENTS AT THE LOWEST LIGHT LEVELS
For D.C. or pulse counting applications where only a small number of photons are available, EMI offers the 9789 Photomultiplier with a 10mm high efficiency bialkali cathode and a unique front end geometry. This tube typically operates at 1350 V overall for 4 x 10^8 gain with a corresponding dark current of 10^-14A at 20°C. Total dark counts are typically 50 counts/sec. at 20°C with a further reduction to 10 counts/sec. at -20°C. The 9789 is available with a quartz (fused silica) window as the 9789QB or with a pyrex window as the 9789B. The 9789 is a direct plug in replacement for the well known 6256/9502.

SCHOOL OF DENTISTRY
UNIVERSITY OF MISSOURI-KANSAS CITY
The University of Missouri-Kansas City School of Dentistry is seeking applicants for the position of Dean. Applicants should possess a D.D.S. degree and have academic and administrative experience. Candidates must have a thorough and broad understanding of general dental practice, the dental specialties, and the progressive dental and dental auxiliary education.

The University of Missouri is an equal employment and educational opportunity institution.

APPLICATIONS ARE INVITED FROM WOMEN, MINORITIES, PEOPLE WITH DISABILITIES, VETERANS, AND OTHER UNDERREPRESENTED GROUPS. UNIVERSITY POLICIES ON DISCRIMINATION AND HARASSMENT APPLY. MENTION OF SPECIFIC RACE, RELIGION, COLOR, OR NATIONAL ORIGIN IN ADVANCE IS NOT REQUIRED.

POSITION WANTED: 40s per week, minimum charge $10. Use of Box Number countless. Reply: Box 1123, No. 442, 10. Payment in advance is required. These rates apply to individuals or companies. Prepaid inquiries for ad space will be returned. People can take display rate for all advertising.

POSITIONS OPEN: $110 per inch. No charge for Box Number. Rates net. No agency commission allowed for ads under 4 lines. No cash discount. Ads over 1 inch will be billed to the nearest quarter inch. Payment for Classified Advertising is required except where satisfactory credit has been established.

COPY OF ADS MUST REACH SCIENCE 4 weeks before the first Friday of the month in which the ad is to be published. Send copy for Personnel Placement advertising to:

SCIENCE, Room 207
1513 Massachusetts Ave., NW
Washington, D.C. 20005

Replies to blind ads should be addressed as follows:

Box (in the city name)
1513 Massachusetts Ave., NW
Washington, D.C. 20005

POSITIONS WANTED

Analytical Biochemist, Ph.D. Desires position in medical research, routine testing or management, with organizations offering research, fermentation, RIA, toxicology, Box 338, SCIENCE, 7/19

Biologist, Ph.D. Desires teaching, research or industrial positions requiring expert taxonomic and research experience in algae and environment. Seven years of university teaching experience. Will publish. Box 346, SCIENCE, 7/19

Cellular Immunologist, Ph.D. Returning from European leave. Seeks tenured faculty/research position. References available. Box 339, SCIENCE, 7/19

Clinical Microbiologist, Board Certified. Postdoctoral training and 5 years experience in 300-bed teaching hospital, physical microbiology laboratory and/or academic position, Box 310, SCIENCE, 7/19

Clinical Pharmacologist with fellowship and A.B.I.M., currently assistant professor pathology and medicine. Clinical trial, laboratory research, and teaching experience. Publications. Seeking West Coast academic or industrial position. Box 346, SCIENCE, 7/19

Geneticist, woman, Ph.D., seeks position. Teaching experience in genetics, zoology, and evolution. Research experience with publications. Box 311, SCIENCE, 7/19

Immunologist, Ph.D. Microbiology, 1965; 8½ years of active research in tumor immunology, tissue culture, cancer biology. Publications. Some teaching experience. Seeks permanent position. Box 341, SCIENCE, 7/12

Organic Chemist, Ph.D. 1966. Experience in neurochemistry (catechol amine metabolism) and in biochemical pharmacology. Publications. Research, teaching, or industry. Box 342, SCIENCE, 7/12

Position of ASSISTANT PROFESSOR OF INDUSTRIAL HYGIENE in the Department of Environmental Health. Duties will include teaching and conducting research in occupational hygiene. Industrial hygiene especially as it relates to new processes and industrial publications. Requires expertise for graduate and undergraduate teaching in industrial hygiene, including new and emerging concepts in related disciplines and participation in continuing education for professionals in field. Required: Ph.D. degree in Industrial Hygiene and a minimum of 5 years of industrial hygiene experience related to publications.

Reply to: Mr. R. N. Deubner, Chairman, Department of Environmental Health, School of Public Health and Community Medicine, University of Washington, Seattle, Washington 98195.

DEPARTMENT OF BIOLOGY
American University of Beirut, is recruiting teaching research faculty for fall 1974 in the following position: Director, of the Laboratory, biochemistry, plant physiology, and animal physiology (vertebrate and invertebrate). More than one opening is anticipated at Assistant or Associate Professor rank. Ph.D. required, postdoctoral research and teaching experience preferred. Salary, fringe and fringe benefits included. Applications with letters of recommendation to: Dr. Philip Basson, Chairman, Department of Biology, American University of Beirut, Beirut, Lebanon, will be considered. A total of 10 positions in American University of Beirut. Second Floor, 380 Madison Avenue, New York, N.Y. 10017.

CELL BIOLOGIST
Assistant or Associate Professorship available September 1974 or January 1975 in new Division of Cell and Molecular Biology. Expected to teach undergraduate cell biology, participate in graduate core course in cell and molecular biology, and be involved in research. Ph.D. preferred. Send résumé and letters of three references to Dr. O. P. Watanabe, Department of Biology, State University of New York at Buffalo, Buffalo, N.Y., 14214.

The University of Connecticut is an Equal Opportunity Employer/Affirmative Action Employer.

CHEMISTRY FACULTY POSITIONS
Permanent opening to teach Physical Science (sophomore) and Astronomy (junior) majors at our off-campus centers (Kitanning and Punxsutawney). Temporary academic year appointment, September 1974, to teach Home Economics and Horticulture (including biochemistry topics) and Physical Sciences at the introductory level. Temporary one-semester appointment, September 1974, to teach Physical Science to non-science majors.

For all positions, a doctorate is desired, but not necessary. Salary and rank commensurate with qualifications and experience. Write Dr. S. L. Tackett, Department of Chemistry, University of Pennsylvania, Indiana, Pa., 15701, by 19 July 1974. An Affirmative Action/EQUAL Opportunity Employer.

DIRECTOR
The Jackson Laboratory invites applications for the position of Director. This is a position of great importance in view of the continued rapid growth of the laboratory. A Ph.D. in Genetics is required. The successful candidate will be expected to continue the tradition of excellence in Genetics research at the laboratory, to encourage and assist junior investigators, and to identify and evaluate new areas of research potential. The Director is expected to be an active participant and leader in the laboratory's research programs. He is also responsible for the management and administration of the laboratory. Applications should include a curriculum vitae and summary of experience, to one of the following:

Dr. F. D. Ebert, Chairman, Search Committee, Marine Biological Laboratory, Woods Hole, Massachusetts.

Dr. James F. Crow, Member, Search Committee, Department of Genetics, University of Wisconsin, Madison.

Dr. Douglas L. Coleman, Secretary, Search Committee, The Johns Hopkins University, Bay Harbor, Maine 04609

An equal opportunity employer.

EARTH SCIENCE-QUATERNARY
Applications are invited for a position (subject to availability of funds) effective 1 July 1975, at Scituate College, University of Toronto. Duties-undergraduate instruction in introductory earth science and advising undergraduate students interested in quaternary geology or physical geography. Applicants should be Ph.D. level. Applicant's teaching experience is preferred. Salary and rank commensurate with qualifications and experience. Closing date for applications is 1 January 1975 or when filled. Send application, including a current curriculum vitae and the names of three referees, to Dr. J. C. Ritchie, Chairman of the Search Committee, Scituate College, University of Toronto, 1265 Military Trail, West Hill, Ontario, Canada.
THREE FACULTY POSITIONS

Three faculty positions available immediately. One Associate Professor (from $15,000 to $20,000), two Assistant Professors ($12,000 to $15,000), depending upon experience and qualifications. Research-oriented persons qualified to undertake research in one or more of the following areas will be considered: Embryology, Plant Biostatistics, Introductory Biology. Ph.D. required. Send resume and names of three references to: Dr. H. Eneo, Chairman, Department of Biological Sciences, Sir George Williams University, Montreal, P.Q., H3G 1M8, Canada.

TWO FACULTY POSITIONS

Available in the Department of Surgery, University of Michigan Medical School. Candidates must be board certified or board eligible in Surgery for full-time academic positions involving research, teaching, and clinical patient care. Professors on the faculty must possess an M.D. degree, teaching experience, and, in several areas, as substantial publication record. Appointment may be at any rank, depending on qualifications and experience. Send resume and names of three referees to: Dr. Philip S. Morse, Chairman, Department of Surgery.

HEAD, DEPARTMENT OF ENGINEERING

Purdue University Calumet Campus solicits applications for the position of Head of the Engineering Department starting with academic year 1975-76. Duties comprise minimal class-room teaching and emphasis on administering a growing engineering curriculum including graduate courses for full-time students. The successful candidate must be a professional engineer with a thorough grounding in some specialty of mechanical, electrical, or chemical engineering, and possess the ability and initiative. Send resume to: Dr. A. W. K. Man, Department of Engineering, Purdue University Calumet Campus, Hammond, Indiana 46323. Purdue Calumet Is an Equal Opportunity/Affirmative Action Employer.

Position of INSTRUCTOR, INDUSTRIAL HYGIENE

University of Environmental Health, Duties include the conduct of field survey, laboratory, and inspections, assessment of the hazard potential of work or other environmental exposures, and participation in appropriate con-trol measures. Participation in the graduate and undergraduate teaching program and in the continuous improvement of the curricular program is required. A master's degree in industrial hygiene is required and some experience in radiation control is desirable. Applicant must possess certification from the American Board of Industrial Hygiene within 2 years of appointment. Position available 1 September 1974. Women and minorities are encouraged to apply. Send resume and references to: Chairman, Department of Environmental Health and Safety, University of Washington, Seattle, Washington 98195.

INSTRUCTOR IN PSYCHOLOGY

Three-quarter time position available for 1 September 1974 in the Department of Psychology, University of Michigan Medical School. The candidate should have a Ph.D. in Clinical Psychology and at least 1 year of post-doctoral clinical experience. Experience should include working with substance abusers, individuals with learning disabilities, mentally retarded patients, and psychotic patients. Teaching experience in basic psychological tests. Background in general clinical work is required. Will teach psychological testing and psychiatric diagnosis. Opportunity for research is available. Code 3101. Send resume to: Box 3101, Science, A Nonsectarian Affirmative Action Employer.

INSTRUCTOR IN PSYCHOLOGY

Half-time position available in the Department of Psychology, University of Michigan Medical School or School of Nursing for 1974. Candidate should have a Ph.D. in Clinical Psychology and at least 1 year of post-doctoral clinical experience. Experience should include working with substance abusers, individuals with learning disabilities, mentally retarded patients, and psychotic patients. Teaching experience in basic psychological tests. Background in general clinical work is required. Will teach psychological testing and psychiatric diagnosis. Opportunity for research is available. Code 3101. Send resume to: Box 345, Science, A Nonsectarian Affirmative Action Employer.

PHYSIOLOGIST

The Roseman School of Marine and Atmospheric Science has an opening for a whole animal physiologist to undertake a secondary interest in environmental physiology, beginning as early as January 1975. Salary for this position and the qualifications required will be determined after a personal interview. In general, the pos- sibility of graduate-level course work in the physiology of marine animals. Appointment will be at a rank and salary commensurate with experience and qualifications. Applicants must have completed the equivalent of a Ph.D. degree in the discipline of environmental physiology. Names of five references to Dr. Barry F. Taylor, Chairman, Department of Environmental Sciences, University of Miami, Rosenstiel School of Marine and Atmospheric Science, 4608 Rickenbacker Causeway, Miami, Florida 33149. Applications close on 31 August 1974.

THE INTERNATIONAL LABORATORY OF MARINE RADIOACTIVITY OF THE INTERNATIONAL ATOMIC ENERGY AGENCY IN MONACO HAS AN OPENING AT THE P-I LEVEL. THE SUCCESSFUL CANDIDATE SHOULD HAVE A KNOWLEDGE OF AND SOME EXPERIENCE IN MARINE RADIOECOLOGICAL RESEARCH. FACILITIES INCLUDE RADIOECOLOGICAL TECHNIQUES EMPLOYED IN THE DETERMINATION OF TRANSURANIC RADIONUCLIDES IS DESIRABLE. PH.D. OR EQUIVALENT IN CHEMISTRY OR CHEMICAL OCEANOGRAPHY NECESSARY.

EMOLUMENTS IN THE REGION OF US.$10,994. ALLOWANCES FOR DEPENDENT SPouse AND CHILDREN. TRAVEL AND REMOVAL EXPENSES PAID. FIXED TERM APPOINTMENT OF 2 YEARS. SEND CURRICULUM VITAE TO DIVISION OF PERSONNEL, INTERNATIONAL ATOMIC ENERGY AGENCY P.O. BOX 590, A-1011 VIENNA, AUSTRIA, NOT LATER THAN 30 DAYS FROM THE DATE OF THIS ISSUE.

TWO LAND CAPABILITY PLANNING POSITIONS

The Association of Bay Area Governments (ABAG) invites applications for two Regional Land Capability Planners to manage and perform the Land Capability Planning Program of ABAG as part of the San Francisco Bay Region Environment and Resources Management Program (SRBMP), a cooperative effort by USGS/USID/ABAG. The study is concerned principally with the geologic and hydrologic condition and processes which affect land use. Competence in this area is essential. This position requires balance of analysis and management skills and land-use planning knowledge essential to the identification of land capability with planning for land capability. Applicants must have demonstrated planning abilities and both research and planning experience. Applicants should have a Ph.D. in land capability. Salary and responsibilities are equivalent to the regional land capability program. Salary is $13,500 to $16,000 per year. Send resume and name of references to: Box 345, Science, A Nonsectarian Affirmative Action Employer.

PHYSIOLOGIST WANTED

For School of Medicine in development. Inquiries to: Sylvauna W. Nye, M.D., Chairman, Department of Pathology, School of Medicine, East Carolina University, Greenville, North Carolina 27854. An equal opportunity/affirmative action employer.

PHARMACOLOGIST

A position is available for a pharmacologist. This pharmacist will teach medical students as a member of a multidisciplinary basic science team. Teaching duties will involve being a part of a new instructional program in a 3-year innovative medical curricular. Applicant should have a Ph.D. or M.D. degree, teaching experience, and a record of research. Responsibilities are negotiable and commensurate with experience.

Send curriculum vitae to Coordinator, Education Programs, University of Illinois School of Medicine, 1400 West Main Street, Peoria, Ill. 61606. This school is a division of the University of Illinois, is an Affirmative Action--Equal Opportunity Employer, and encourages applications from members of minority groups and women.

PROFESSOR OF BIOMETRY

Professor of Biometry is required immediately. Applicants should have a Ph.D. in biometry. Experience in statistical applications in the biological sciences is desirable. Teaching experience in applied biometry is recommended. Salary is negotiable. Application deadline is March 1, 1975. Send curriculum vitae and names of three references to: The Chairman, Department of Biometry, School of Medicine, University of California, San Francisco, California 94143. An equal opportunity/affirmative action employer.

RESEARCH ASSOCIATE

Position available immediately to assist in research on red cell membrane biochemistry of selected enzymes activities in various diseases. Ph.D. or M.D. required. Experience in red cell membrane biochemistry is essential. Applications are invited. Send curriculum vitae and names of three references to: Box 590, The University of Washington, Seattle, Washington 98195. An equal opportunity/affirmative action employer.

UT-AEC COMPARATIVE ANIMAL RESEARCH LABORATORY

TWO FULL-TIME RESEARCH STAFF POSITIONS OFFERED

Plant Genetics: Studies on mutagenesis via radiation and chemical agents as it relates to growth (cell and tissue culture) and organismal (seeds, tubers, cuttings, and so forth) level including development of germ plasm of economic plants. Individuals with Ph.D. in genetics are invited to apply. Genetics experienced in molecular/biochemical/immunological (plant) studies on transport of heavy metals across gastrointestinal membranes are invited to apply. Send curriculum vitae and names of three references to: Box 345, Science, A Nonsectarian Affirmative Action Employer.

SENIOR PSYCHOLOGIST

Applications are invited for a permanent position at the rank of full professor, effective 1 July 1975, in the Department of psychology at the State University of New York at Albany. Duties—undergraduate and graduate instruction and supervision of faculty; development of an active research program. Applicants must have a Ph.D. or equivalent in 5 years of academic or equivalent experience, and an established record of professional activity and research experience. An equal opportunity/affirmative action employer.

VICE PRESIDENT FOR ACADEMIC AFFAIRS

DEAN OF THE GRADUATE SCHOOL

The University of Minnesota (a multi-campus institution) invites applications from qualified individuals for these major administrative positions. Active consideration is under way. Search committee reports will be forthcoming. Please submit resume to: Dr. George Shapiro, Chairman, Search Committee, 317 Rolland Hall, The University of Minnesota, Minneapolis, Minnesota 55455. Nominations and applications from women and members of minority groups are especially encouraged.

SCIENCE, VOL. 185
Oxygen Uptake Made Easy

Only the YSI Model 53 Biological Oxygen Monitor lets you monitor O₂ uptake or evolution rates of 3 to 300 μl O₂/hr with 1% accuracy, use substrates as small as 1 ml, add inhibitors or activators easily, withdraw samples during test, get rate curves on any 100 mV recorder, have useable data in seconds, and complete most experiments in 5 to 15 minutes.

Write for specifications and a folder of 200 research references.

Director of Research & Development
Pharmaceuticals

The rapid growth of this ethical pharmaceutical company has required the consolidation of research groups under one executive who will report directly to the President.

The duties of the Director of Research and Development will include the planning and direction and coordination of chemical laboratories, pharmacology, medical affairs, clinical investigation, scientific communication, etc. Our department heads are aware of this post.

The successful candidate should have a record of achievement in securing NDA approvals and in the supervision of a group of interdisciplinary sciences.

The position which may be filled by a Ph.D., M.D. or Ph.D./M.D. offers a fine opportunity for executive development.

Company is located within 50 miles of N.Y.C. Salary open. Send detailed résumé including salary history to:
Box 352, Science

An Equal Opportunity Employer M/F

Department of Kinesiology
Simon Fraser University

Academic - Physician

An appointment of a physician with a well-developed research interest in any aspect of human physiology, bioengineering, prosthetics or human factors is offered in the Department of Kinesiology. The appointee will be required to work in an interdisciplinary environment with biochemists, engineers, work physiologists, or biomechanics faculty in a department which has growing graduate and undergraduate degree programs.

Although the University itself does not have a medical faculty, the appointee will be encouraged to maintain and develop his clinical interests with the Faculty of Medicine at a nearby university and local hospitals. For suitably qualified applicants the possibility exists of a joint appointment with the Computing Science Department. The appointment will be made at either the assistant or associate professor level, depending upon qualifications. Salary negotiable.

Applications, together with three references, to
Dr. E. W. Banister
Department of Kinesiology
SIMON FRASER UNIVERSITY
Burnaby, British Columbia, V5A 1S6
(From whom further details can be obtained)

Microbiologist/Mycoologist
Challenging Opportunity

The job
You will direct the improvement of antibiotic-producing cultures by genetic means, the development of automated screening procedures for superior mutants, and the maintenance of selected strains for production use. Related genetic research will be strongly encouraged. The successful candidate will supervise two degree Microbiologists.

The candidate
You should have a Ph.D. in microbiology/genetics with a minimum of 2 years experience in fermentation strain development. Some industrial experience is preferred.

The company
You will be working for a leading internationally based pharmaceutical company. Our plant, located in scenic Chester County, is within easy commuting distance of Philadelphia, Pa., and Wilmington, Del., and offers well-equipped laboratories as well as a fully operational pilot plant. Liberal benefits and prospects for a bright future await the successful applicant.

Send résumé and salary requirements to:

AN EQUAL OPPORTUNITY EMPLOYER

THE UNIVERSITY OF ADELAIDE

invites applications for appointment as

LECTURER
IN
ANATOMY AND HISTOLOGY

A medical qualification registrable in South Australia is desirable but not essential. The appointment will be made as soon as the person concerned is able to assume duty.

The Department of Anatomy and Histology teaches University students of Medicine, Dentistry, and Science and, in addition, Physiotherapy and Occupational Therapy students of the South Australian Institute of Technology (for further particulars see statement referred to below). Research fields are neuro-endocrinology, human and comparative neurology, cell biology, experimental embryology, and clinical anatomy. Persons with an interest in clinical anatomy (medical graduates) or neuroendocrinology are especially invited to apply.

SALARY SCALE: $4869-4701-4695-11982 (plus a loading for medical qualifications at the rate of $4833 a year); with superannuation on the F.S.S.U. basis. Initial salary will be fixed within the scale in accordance with qualifications and previous experience.

FURTHER INFORMATION, including list of particulars required in an application, is available from the Registrar of the University or from the Secretary-General, A.C.U., 36 Gordon Square, London, WC1H 0FF.

APPLICATIONS should reach the Registrar, G.P.O. Box 498, Adelaide, South Australia, not later than 31 July 1974.
Olympic medalists we ain't. But our Technical Specialists have had uncommon training, too.

Looks difficult, doesn’t it? And it is. You had better know every technical detail about the capabilities and applications of your equipment from the tips of your skis to the bindings that hold your boots. That’s where our S/P Technical Specialists have very common ground with the uncommon training of Olympic ski jumping medalists.

Our 39 S/P Technical Specialists are in a class by themselves. They are concerned with very expensive, very technical, very sophisticated, very uncommon equipment. And it’s their job to evaluate your needs, then to translate the capabilities and applications of this complex equipment into common sense terms to help you. That’s why we train them right at the manufacturer’s plant. So they will know as much about the equipment as the engineers who built it.

So before you jump to a conclusion, talk to our uncommon S/P Technical Specialist. He’ll make a lot of common sense to you.
The AO has a new high intensity illuminator with a 20 watt tungsten Halogen lamp that gives more light and longer lamp life. High color temperature offers greater operating efficiency and truer color rendition particularly for photomicrography. Further, the lamp is self-cleaning to assure consistent brightness throughout the exceptionally longer life. The lamp control is solid state and continuously variable to give you the exact illumination intensity desired. A transformer is neatly fitted inside the microscope base, out of the way.

Of course there is more. An infinity corrected optical system, focusable nosepiece, vibration-free stage that locks to the stand and dual viewing models—all pioneered by AO to give you the finest laboratory microscope available today.

Ask your authorized AO dealer or sales representative for a demonstration. In the meantime send for detailed brochure.

American Optical, Scientific Instrument Division, Eggert Rd., Buffalo, N.Y. 14215
