The American Association for the Advancement of Science was founded in 1848 and incorporated in 
1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to 
 improve the effectiveness of science in the promotion of human welfare, and to increase public under-
standing and appreciation of the importance and promise of the methods of science in human progress.

COVER

Gray seal (Halichoerus grypus) spends most of its life in the sea and can sleep on the surface, underwater, and on land. The seal proceeds from active waking (upper left) to quiescent waking (upper center) to rapid eye movement sleep (upper right) to slow-wave sleep (lower six views). See page 553. (S. H. Ridgway and P. L. Romano, U.S. Navy, San Diego, California)
