Miscellaneous Notes

International Women's Year Resolution. At its 31 January meeting, the AAAS Council passed a resolution asking the Association to celebrate International Women's Year by recognizing the achievements of women in the sciences and engineering, by taking appropriate initiatives in the conduct of American business, and by exercising effective national leadership to further the opportunities for women in science.

Psychology Section of SWARM. Psychologists who are members of the Southwestern and Rocky Mountain Division of AAAS who are interested in forming a Psychology Section of SWARM are invited to communicate with Dr. Keith J. Lindsay, Chairman. Social Sciences Section, AAAS-SWARM, Angelo State University, San Angelo, Texas 77901.

NOVA Program Schedule

16 March. The Other Way. E. F. Schumacher, author of "Small is Beautiful," is convinced that there must be "another way" for technology to serve mankind without gobbling resources. He calls it Intermediate Technology—machines that effectively and efficiently extend the capacities of man without replacing him (a BBC production).

23 March. The Crab Nebula. In A.D. 1054 the Chinese recorded the explosion of a dying star that was bigger than our sun. Centuries later, scientists discovered the Crab Nebula that was created at the explosion. This "pulsing" energy source has since been the subject of great interest to astronomers (a BBC production).

30 March. The Last World of the Maya. Eric Thompson, an archeologist, takes us on a pilgrimage through the Mayan world in Central America. He charts the rise and fall of one of the world's strangest civilizations. The Mayas flourished for over a thousand years, were destroyed by the Spanish, and finally rediscovered in the 19th century (a BBC production).

6 April. Will the Fishing Have to Stop? The excellent protein in fish could help the world food shortage. But in 1972 the world fish catch dropped. Oceanographers and biologists have been studying ocean productivity to determine if man's overfishing or natural environmental fluctuations have caused the shortage (a WGBH production).

TIAA CREF

The Best Deal on Life Insurance, by Far, is TIAA

Independent consumer studies continue to confirm that TIAA life insurance costs substantially less than policies sold through life insurance companies that serve the general public.

These days, when it's more important than ever to squeeze the most from every dollar, it makes more sense than ever for college employees and other eligible persons to look to TIAA for the new life insurance they need. By the way, TIAA policies include the unique "Cost of Living" provision to help prevent inflation from nibbling away the purchasing power of the death protection.

While TIAA offers plans to meet different situations, and a free advisory service to help select the right plan, most educators with TIAA policies prefer Term insurance because with Term they can easily afford to carry the high level of family protection they need. For example: $100,000 of decreasing Term insurance costs only $184 at age 30.

Here are illustrative cost figures for different ages: $100,000 20-Year Home Protection Policy

This Home Protection policy is level premium Term insurance that gives its highest amount of protection initially, reducing by schedule over a 20 year period to recognize decreasing insurance needs. Home Protection policies are available for several other insurance periods in amounts of $5,000 or more and are issued at ages under 55.

ELIGIBILITY to apply for TIAA policies is limited to employees of colleges, universities, and certain other nonprofit educational institutions that qualify for TIAA. If you are eligible, complete and send the coupon so we can mail the Life Insurance Guide and a personal illustration of TIAA policies issued at your age. TIAA is nonprofit and employs no agents.

Teachers Insurance and Annuity Association
College Retirement Equities Fund
730 Third Avenue, New York, N.Y. 10017
