BOOK REVIEWS
Mechanisms in Recombination, reviewed by H. L. K. Whitehouse; Plant Carbohydrate Biochemistry, F. A. Loewus; The Study of Benthic Communities, K. R. Walker; Myriapoda, R. Hoffman; Crop Physiology, R. S. Bandurski; Books Received

Structure of Coat Proteins in P1 and Id Virions by Laser Raman Spectroscopy: G. J. Thomas, Jr., and P. Murphy .................................................. 1205

Denudation Studies: Can We Assume Stream Steady State? S. W. Trimble ...... 1207

Weyl's Theory of Glaciation Supported by Isotopic Study of Norwegian Core K 11: J. C. Duplessy, L. Chenouard, F. Vila .................................................. 1208

Intercalation of Metallocenes in the Layered Transition-Metal Dichalcogenides: M. B. Dines ........................................................................... 1210

Chronotypic Action of Theophylline and of Pentobarbital as Circadian Zeitgebers in the Rat: C. F. Ehret, V. R. Potter, K. W. Dobra ........................................ 1212

Flavonoids as Inhibitors of Lens Aldose Reductase: S. D. Varma, I. Mikuni, J. H. Kinoshita ........................................................................ 1214

Antipsychotic Drugs: Direct Correlation between Clinical Potency and Presynaptic Action on Dopamine Neurons: P. Seeman and T. Lee .................. 1217

Golgi Complex-Endoplasmic Reticulum Transition Region Has Rings of Beads: M. Locke and P. Hule ........................................................................ 1219

Poly(ADP-ribose): Polynucleotide Still without a Function: M. Smulson; Organotransition-Metal Chemistry: Y. Ishi and M. Tsutsui; Polyunsaturated Fatty Acids: J. F. Mead .................................................. 1223

Blood Glucose Analyzer; Pipette Tip-Loading System; Ionized Calcium Analyzer; Hematology Standard; Disposable Thermometers; Blood and Tissue pO2 Monitor; Cyclic Adenosine Monophosphate Assay; Peroxidase-Conjugated Antisera; Thyroxine Radioimmunoassay; Literature ................................ 1228

### COVER

Aircraft used in atmospheric electrical research for detection of organized convection (top left). The vertical electric field was measured between radioactive probes above and below the left wing tip. Much of the data were gathered during extended duration passes 3 meters above the ocean (bottom left). Layers of positive space charge exist at the top of the atmospheric haze layer (right) and within 150 meters of the ocean. See page 1171. [B. J. Kaplan, Newton, Massachusetts]
