The American Association for the Advancement of Science was organized 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress. Postmaster: Send Form 3579 to SCIENCE, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005.

COVER
Anangula core with articulated platform tablets illustrating their removal by horizontal blows to prepare the platform before striking blades off vertically. The blades were used for tools, points, and knives (actual size about 5 meters across). See page 507. [W. S. Laughlin, University of Connecticut, Storrs]
