The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress. Postmaster: Send Form 3579 to SCIENCE, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005.

COVER

(Above) Houses in the floodplain of the Meramec River, a tributary of the Mississippi River, were flooded by backwater from the Mississippi on 5 April 1973. On 29 April, the Mississippi completely overpowered the Meramec and caused it to run backward. (Below) Aerial view of Saint Louis, Missouri (looking north from East Saint Louis, Illinois), on 28 April at 11 a.m. shows the constriction of the river caused by man-made levees. The levees are indicated on the east side by roads. See page 681. [Charles B. Belt, Jr., Saint Louis University]
